Notice of Overpayment..... 103

The Compensation Reference Handbook has been developed by the MEC Contract Administration (Enforcement) Committee to provide the line pilot with a quick and easy reference to various compensation, scheduling, grievance decisions, and the *Pilot Working Agreement* rules and processes so that a pilot can understand how they are paid.

Since this document's primary focus is compensation, it does not cover all of the scheduling rules which are discussed in the *Scheduling Reference Handbook*, the *PBS Reference Handbook*, or other Delta MEC communications.

The *Compensation Reference Handbook* is a PDF document similar in format to the *Pilot Working Agreement*, the *Scheduling Reference Handbook*, the *Training Reference Handbook*, and the *PBS Reference Handbook*. It is optimized for use on tablets, smartphones, and computers. The PDF format and bookmarking make it easy to navigate and search. As changes to our PWA occur, they will be incorporated into the *Compensation Reference Handbook* as updates.

Because of the complex nature of our pay, this document does not capture every possible way a pilot is compensated. It is possible these pay treatments could be added to a future version of this document. The Company is constantly making changes to our pay displays, for reasons such as implementing the *Pilot Working Agreement*, so the screenshots in this document may not represent the most current version. While every attempt has been made to ensure accuracy, this document has **NOT** been reviewed or approved by Delta Air Lines and no guarantee can be made as to the accuracy of its contents. As such, it is not legally binding or precedent setting. Information that was sourced from previously agreed and binding documents remains so under the terms of the original documents. The *Compensation Reference Handbook* is for reference only and is not intended to take the place of the PWA, Scheduling Alerts, or Contract Awareness Bulletins. The *Compensation Reference Handbook* is intended to be a living document with future versions incorporating corrections to any discovered errors. Accordingly, ALPA does not warrant the information herein. If you encounter a mistake or a situation that is not covered in this document, please help us provide the most accurate information to the Delta pilots by letting us know about it and submitting a [DART](#).

INTRODUCTION

PAY BASICS

Basic Pay Terms and Concepts

Active Payroll Status (2 A. 6. and 2 A. 135.)

A pilot is on an active payroll status if they are not:

- Furloughed,
- Receiving benefits under the Disability & Survivorship Plan (i.e., “on disability”),
- On a military leave that exceeds 30 consecutive days,
- On a medical leave,
- On personal leave, except for known personal leave,
- On an FMLA leave,
- On bonding leave,
- On maternity leave, or
- Serving a disciplinary suspension.

Active payroll status is a trigger for many processes at Delta, including computation of a pilot’s profit sharing, the eligibility of a pilot to accrue vacation, and participation in Advanced Entitlements.

Pay and Credit versus Pay, No Credit (2 A. 57. and 2 A. 200.)

The PWA defines two terms commonly used to refer to the type of pay a pilot will receive:

“Credit” means time that is attributed to a pilot for PWA flight time limitations purposes

“Pay, no credit” means pay due a pilot for an assignment in addition to all other pay to which the pilot is otherwise entitled without the pilot receiving *credit* for such assignment.

The PWA makes frequent use of both terms and generally refers to items as “pay and credit” or “pay, no credit.” Said another way, *all credit is pay, but not all pay is credit.*

Items which are *pay and credit*:

- Apply to certain PWA limits, e.g. the white slip pickup limit, the green slip trigger
- Offset reserve guarantee for reserve pilots
- Can be used for full service bank transactions

Items which are *pay, no credit*:

- Do not apply to PWA limits
- Are paid above reserve guarantee
- Cannot be used for full service bank transactions

The following table includes selected examples of items which are pay and credit or pay, no credit:

Pay and Credit	Pay, No Credit
• Rotation pay for non-premium pay rotations • Sick leave • Minimum calendar day • 2:00 DPM • Inverse assignment (in certain situations IAW <i>Section 23 U. 3.</i>) • Qualification training • Green slips (in certain situations IAW <i>Section 23 U. 1.</i>) • Company removal guarantee • Full service bank transactions	• ADG Carveout Pay • Sit Pay • Extended Duty Period Pay • Distributed training (QCQ) • Inverse assignment (in certain situations IAW <i>Section 23 U. 3.</i>) • Green slips (in certain situations IAW <i>Section 23 U. 1.</i>) • Vacation * • CQ training * • Short call credit (SCC)

* While vacation and CQ training are pay, no credit, they are both considered as pay and credit for purposes of determining if a pilot has met the green slip trigger (*Section 23 U. 1.*).

Pay Rates

Composite Hourly Rate (2 A. 47.)

A pilot's composite hourly rate is the basic hourly rate of pay set forth in the *Section 3 B.* pay tables for each aircraft model, longevity step, and status as Captain or First Officer.

Pay Tables (3 B.)

The PWA prescribes hourly rates for each aircraft model with a specified pay rate. This includes:

- Aircraft currently in service,
- Select aircraft previously in service (B-777, B737-700), and
- Other specified aircraft that are not currently in service and have never been in service at Delta (EMB-190/CRJ-900, EMB-195).

Pay rates are specified for each longevity step and all scheduled raises for the term of the PWA are incorporated in the *Section 3 B.* pay tables.

Monthly Pay Timing (3 G.)

Pilots are to be paid for each bid period in the form of two semi-monthly payroll checks:

- An end-of-month (EOM) partial payment, paid on the last business day of the corresponding calendar month of *one-half the reserve guarantee* at their hourly rate as of the date of the payment. For categories with multiple pay rates, this advance is calculated using the lower rate even though the PWA says it will be at the composite rate. This payment is referred to as a "Flight Advance/Pilot" on the Delta Pay Statement (pay stub), and
- A consolidation payment on the last business day prior to the 16th of the *following* calendar month for the difference between their total earnings for the bid period and the amount of their EOM partial payment, if applicable. This payment is referred to as "Flt Pay/Pilot" on the Delta Pay Statement (pay stub).

Note that the EOM check is half of a pilot's *reserve guarantee*, even if a pilot is a regular pilot. The phrasing of the EOM check as a "Flight Advance" frequently causes confusion. While the payment is *in advance of payroll closing*, it is paid at the end of the month for work a pilot has already performed. Since Delta pilots are paid in arrears, paychecks received are the result of activities from the previous bid period.

Transactions regarding a pilot's full service bank, the features of which are described later in this chapter, are processed at the *end* of a bid period, regardless of when in the bid period the pilot exercises the bank options (*Section 12 N. 8.*).

Date of Rotation (3 F.)

For pay and credit purposes, the date upon which a pilot is scheduled to depart (block-out) on the first flight segment of the rotation is considered the date the rotation is flown.

Assume a pilot holds a rotation that blocks-out on January 31, 2024. *Section 3 F.* means that the pay rates effective for that rotation are the rates effective on January 31, 2024. This also means that a pilot who operates a rotation that departs before, but operates through, their anniversary date is paid for that rotation at the pay rate in effect on the date of departure.

For the purposes of *Section 3 F.*, the date of departure is determined by the *scheduled block out in base time of the trip*. For example, a NYC based pilot on an out-of-base SLC trip will have departure determined by scheduled block out in Mountain Time.

New Aircraft Models (3 E.)

The PWA includes a process to determine pay rates and work rules for aircraft that are not already covered by the pay tables in *Section 3 B.* The Company is required to provide notice to the Association of its intention to introduce a new aircraft. The parties will meet to negotiate pay rates and work rules, and if unable to reach an agreement, the issue will be submitted for expedited arbitration. Until the process is complete, the Company will establish pay rates and work rules that are in its judgement consistent with the criteria of *Section 3 E. 4.* Initial rates of pay agreed to by the parties or established by the Five Member System Board of Adjustment will be effective as of the date of the first conversion into the category (if the aircraft model is determined to be a new aircraft type) or as of its actual revenue service date (if the aircraft model is determined to be part of an existing aircraft type)

Pay Guarantees

Regular Line Guarantee (4 B.)

The line guarantee of a regular pilot is the lesser of 65 hours or their block hour limit. If you are awarded a schedule in PBS that has a total credit of less than 65 hours, you will receive a plus up equal to the difference between your awarded line and 65 hours. If you subsequently add more credit to your schedule (swap with the pot, pilot-to-pilot swap board, white slip, etc.) the plus up will be reduced by the amount of the additional credit. For example, a pilot is awarded a 62-hour line in PBS. They will be given a 3-hour plus up. If they swap a 12-hour trip for a 13-hour trip, they would have a credit of 63 hours and the plus up would be reduced to 2 hours.

Because a pilot can make changes to their line over the month, they will not see the regular line guarantee on their Time Card until after the month has ended. This plus will be added as "4B1A" as pay and credit to the last day of the bid month in an amount to get your regular line to 65:00. This may not take you to 65 hours of credit if some of the value of your line from PBS came from pay, no credit items such as CQ or vacation or other absences that have no pay but do have a value in PBS for purposes of building a line.

Reserve Line Guarantee (4 C.)

Reserve line guarantee is discussed later in this document as a separate chapter.

Company Removal Guarantee (4 E.)

If a *regular* pilot is removed from a rotation or a portion of a rotation for the convenience of the Company, they will receive pay and credit for the scheduled credit of the removed rotation or portion thereof, plus their accumulated credit for any portion of such removed rotation flown. They will also receive international pay and ocean crossing pay for the removed rotation, if applicable. For a list of exceptions to removal for the convenience of the Company, see *Section 4 E. 1. a. - p.*

A regular pilot who is removed from a rotation due to a conflict with a reserve assignment will receive pay and credit for the greater of the scheduled credit of the rotation removed or the credit accumulated on the regular portion of their line from such reserve assignment. (*Section 4 E. 2.*)

Rotation Guarantee (4 F.)

Rotation guarantee ensures that a *regular pilot* is paid no less than the awarded value of a rotation when they are removed from all or a portion of the rotation after the completion of line adjustments. Reserve pilots *are not entitled* to rotation guarantee. If a regular pilot is removed from all or a portion of a rotation due to irregular operations or an FAR or PWA conflict, they will receive pay and credit for the greater of the scheduled credit of the rotation, or the accumulated credit for a recovery or rerouted rotation.

Rotation guarantee is not due when the FAR or PWA conflict is as the result of a white slip or yellow slip award from the prior bid period. Rotation guarantee also includes all pay, no credit applicable to such rotation under *Section 12 I. Exception* (ADG Carveout Pay), *Section 12 S.* (Sit Pay), and *Section 12. T.* (Extended Duty Period Pay). Rotation guarantee *does not include* Holiday Pay. As rotation guarantee is always pay and credit, these aspects of a rotation's value that were originally pay, no credit become pay and credit when applied to a regular pilot's rotation guarantee. A pilot entitled to Rotation Guarantee may be assigned recovery and reroute flying under *Section 23 K.* and *23 L.* Please see the [Scheduling Reference Handbook](#) for more information.

The rotation guarantee of an asterisk rotation will be based on the portion of the rotation (as originally published in the bid package) that is contained within the bid period. In addition to awarded rotations after completion of line adjustment, rotation guarantee will also apply to inverse assignments, inverse assignments with conflict, swap with the pot, white slips, green slips, green slips with conflict, and rotation swaps between regular pilots.

If a *regular* pilot is rerouted, the total value of their new rotation as flown (including any new applicable pay, no credit items) will be compared to the total value of their original rotation. The pilot will receive no less than the total value of their original rotation, with any difference being applied as pay and credit rotation guarantee.

A *reserve* line holder is not guaranteed the original value of a rotation from which they are removed or rerouted. As such, they may be subject to losing the value of any portion of their rotation that is not operated as scheduled. However, any pay, no credit that is due under the rerouted rotation will always be paid above their reserve guarantee.

Miscellaneous Guarantee (4 I.)

A pilot will receive pay and credit for the value of a known absence (other than an unpaid absence) that was on their initial line of time from PBS that is subsequently cancelled. (*Section 4 I. 1.*)

A pilot who is ordered or required by the Company to attend a disciplinary (or pre-disciplinary) proceeding or investigatory interview under *Section 18* on the pilot's scheduled day off will receive additional pay, no credit equal to the ADG (in addition to any other form of pay), provided that such pilot is not on a paid Company/administrative leave at the time of the meeting. (*Section 4 I. 2.*)

ROTATION PAY

Rotation Pay (12 L.)

The total pay and credit for a rotation is defined in **Section 12 L.** When a rotation *is constructed*, the total pay and credit is the greater of:

- Average daily guarantee, or
- Rotation credit, or
- The sum, on a duty period basis, of the greater of:
 - Duty period credit,
 - Duty period minimum, or
 - The scheduled flight time for each duty period.
- Or,
- The sum, on a daily basis, of the greater of:
 - Duty period credit,
 - Duty period minimum,
 - Minimum calendar day, or
 - The scheduled flight time for each duty period.

After completion of a rotation, a pilot will receive pay and credit for the greater of:

- Rotation credit, or
- The sum of the pilot's duty period credits, or
- Average daily guarantee, or
- The sum of the pilot's DPMs, or
- The sum, on a daily period basis, of the greater of:
 - A pilot's flight time, or
 - Minimum calendar day,
- Or
- The pay and credit determined at rotation construction

Pay and credit in excess of flight time will be calculated at the pay rate applicable to the pilot's last non-deadhead (DH) flight segment of the rotation. Note that this excess credit is sometimes called "soft credit."

Average Daily Guarantee (12 I.)

Average daily guarantee (ADG) is a minimum pay based on the total number of days of a rotation. A pilot will receive an ADG of 5:15 per day of each rotation, including days added as a result of reroute or late operations. It is important to note that ADG is a "soft" minimum day and only applies based on the total value of the rotation compared to its length. It does not apply as 5:15 for each individual day. Average daily guarantee is listed on the rotation as "ADG."

ADG Examples

A 4-day rotation has daily values of: 4:00/5:00/4:00/4:00. The total of the 4 days is 17:00, which is less than the 4-day ADG of 21:00 (4 x 5:15 = 21:00). The rotation will pay 21:00.

A 4-day rotation has daily values of: 4:00/4:00/8:00/4:00. The total of the 4 days is 20:00, which is less than the 4-day ADG of 21:00. The rotation will pay 21:00. Note that the 8:00 on the third day of the rotation "offsets" the ADG pay because it is an *average*. In other words, the rotation *does not* pay 5:15/5:15/8:00/5:15.

A 4-day rotation has daily values of: 5:00/6:00/8:00/4:00. The total of the 4 days is 23:00, which is more than the 4-day ADG of 21:00. The rotation will pay 23:00.

ADG Carveout Pay and Examples (12 I. Exception)

For the purposes of calculating ADG, a “day” is defined as a calendar day except as follows:

- A pilot will not be entitled to ADG for the last day of a rotation that has a release prior to 0200, unless the rotation was scheduled or rerouted to release on or after 0200 on such day.
- If a pilot is not entitled to ADG on the last day of a rotation under **Section 12 I.**, the pilot will receive 2:00 pay, no credit (in addition to all other pay) for the rotation. This is referred to as ADG Carveout Pay.

For example, assume a 3-day rotation with a block of less than 15:45. Based on the release time, the rotation will pay as follows:

- If C Day releases at 2300, the rotation will pay 15:45 pay and credit (ADG for 3 days)
- If due to late operations, actual release is D Day at 0100, the rotation will pay 15:45 pay and credit (ADG for 3 days) plus 2:00 pay, no credit (ADG Carveout Pay). Note that minimum calendar day for D Day could cause the pay and credit to be higher than 15:45.
- If due to late operations, actual release is D Day at 0230, the rotation will pay 21:00 pay and credit (ADG for 4 days).

Rotation Credit (12 K.)

Rotation credit, or “1 for 3½,” is a minimum credit calculation based on the time away from base (TAFB) for a rotation. TAFB starts at report time at the start of the rotation and ends upon release at the pilot’s base at the end of the rotation. Because rotation credit is based on the length of the entire trip, it is sometimes referred to as “Trip Credit” or a “Trip Rig” and listed on the rotation as “TRP.” A pilot will receive a minimum credit of 1 hour for every three and one-half rotation hours, prorated on a minute-by-minute basis. Rotation credit is most likely to pay on long rotations with relatively low block time that have an early report and late release.

Rotation Credit Example

A rotation reports on A Day at 1000 and releases on D Day at 1500, for a TAFB of 77:00. Rotation credit will be 22:00 (77 / 3.5).

Duty Period Credit (12 J.)

Duty period credit, or “1 for 2”, is a minimum credit calculation for each day of a rotation based on the length of the duty days. It is most likely to pay on days with long sits or multiple short legs. Duty period credit is listed on the rotation as “DTY.” Duty period credit is based on the greater of scheduled or actual duty time and is calculated as follows on a minute-by-minute basis:

- One hour credit for every two hours of duty time from 0600 to 2159 (pilot’s base time), and
- One hour credit for every one and one-half hours of duty time from 2200 to 0559 (pilot’s bad time), or from 2200 to release from a duty period that includes 0359 (pilot’s base time)

Duty Period Credit Examples

A duty period has a report time of 1000 and a release time of 1959. Duty time of 10:00 will have a duty period credit of 5:00 (1 for 2).

A duty period has a report time of 2200 and a release time of 0229. Duty time of 4:30 will have a duty period credit of 3:00 (1 for 1½ for the time between 2200 to 0559).

A duty period has a report time of 2300 and a release time of 0759. Duty time of 9:00 will have a duty period credit of 6:00 (1 for 1½ for time after 2200 because the duty period includes 0359).

A duty period has a report time of 2000 and a release time of 0059. Duty time of 2:00 from 2000 until 2159 will have a duty period credit of 1:00 (1 for 2), and duty time of 3:00 from 2200 until 0059 will have a duty period credit of 2:00 (1 for 1½). The total duty period credit is 3:00.

Duty Periods Greater than 10 Hours

For unaugmented duty periods, the duty period credit will only apply until a duty period exceeds 10 hours, after which Extended Duty Period pay (EDP) will apply. For augmented duty periods, duty period credit will apply for the entire duty period.

For example, an unaugmented duty period reports at 0800 and releases at 1959, for a length of 12:00. Duty period credit will pay 5:00 pay and credit for the first 10 hours, and EDP will pay 2:00 pay, no credit for the last 2 hours.

Duty Period Minimum (12 H.)

A pilot who reports for a rotation will receive a minimum pay and credit of 2:00 for each duty period. Duty period minimum is listed on the rotation as “DPM.” Prior to the addition of the minimum calendar day (MCD), the payment of a 2:00 DPM was more common. However, because MCD pays more (2:30) than DPM, and is applied to all rotations without an ocean crossing, it is rare to see a rotation that pays based on DPM. A pilots pay may still be affected by DPM in the following circumstances:

- A rotation containing an ocean crossing which also has a duty period of less than 2:00. For example, a MSP rotation with the first day DH only to DTW, followed by an ocean crossing flight the next duty period from DTW. In this case MCD would not apply, and the MSP-DTW leg is less than 2:00. The pilot would receive a 2:00 DPM for this day.
- A reserve pilot awarded a rotation as a green slip with flying on both an X -day and an on-call day. Consider that scenario with the rotation above. If only the 16th is an X-day, the value of that day will be pay, no credit, with the balance of the rotation pay and credit. Flight 2392 has a value of 1:37 (1:32 block plus 0:05 minutes under). The pilot will receive an additional 0:23 minutes of DPM to bring the value of the day to 2:00. Because the rotation does not contain an ocean crossing, 2:30 MCD also applies. However, this is a “soft credit” which applies to the last day of the rotation (shown as “0.30MCD”), and it will not be included as part of the pay, no credit value of the green slip.

- A carry out rotation beginning on the last day of the bid month with less than 2 hours of block on the A Day and the remaining value of the trip in the following bid month.

Minimum Calendar Day (12 U.)

A pilot will be guaranteed minimum pay and credit of 2:30 for each calendar day of their rotation (including days added as a result of a reroute or late operations). Minimum calendar day is listed on the rotation as "MCD." Minimum calendar day will not apply to a rotation with an ocean crossing segment.

Minimum Calendar Day Examples

	A Day	B Day	C Day
Block	6:00	0:00	7:30
MCD	0:00	2:30	0:00
Total	6:00	2:30	7:30

Pay and credit total for the three days is 16:00. The trip will pay 16:00.

	A Day	B Day	C Day
Block	5:00	0:00	6:30
MCD	0:00	2:30	0:00
Total	5:00	2:30	6:30

Pay and credit total for the three days is 14:00. The trip will pay ADG of 15:45.

ALPA COMPENSATION REFERENCE HANDBOOK

DELTA

	A Day	B Day	C Day
Block	7:00	2:00	7:00
MCD	0:00	0:30	0:00
Total	7:00	2:30	7:00

Pay and credit total for the three days is 16:30. The trip will pay 16:30.

Report and Release on Different Calendar Days

Pay and credit for a flight segment is associated with the block-out time of the flight segment. So if a flight departs prior to midnight but extends into the next day, all the block time for that flight is associated with the first day, and a pilot will still be due a minimum pay and credit of 2:30 for the following day.

#L756 TU		EFFECTIVE MAY06 ONLY						CHECK-IN AT 13.46			
DAY	FLIGHT T	DEPARTS	ARRIVES	C	BLK.	TURN	BLK/MAX	FDP/MAX	PWA	FDP/MAX	
A	1855	JFK 1446	STI 1841	3.55	1.25	3NE	M				2
	1969	STI 2006	JFK 0008	4.02			M	10.22/12.00	10.22/11.30		2
							7.57/	9.00	.00CRD	7.57TL	
							2.30MCD	.00TRP	.00DPA	.00ADG	
TOTAL CREDIT	10.27TL	7.57BL	2.30CR	10.22FDP						TAFB	10.52
TOTAL PAY	13:19TL	.00SIT	.52EDP	.00HOL	2.00CARVE						

In the scenario above, flight 1969 departs STI at 2006 on A day, therefore the pay and credit for the entire leg is associated with A day. Because the rotation releases after midnight and touches B day, the pilot is due another 2:30 MCD for that day. ADG Carveout Pay also applies in this scenario since B day is the last day of the rotation.

Sit Pay (12 S.)

Sit Pay provides one minute of pay, no credit (in addition to all other pay) for every 2 minutes of sit time in excess of 2 hours. Sit time is measured from the scheduled block-in time to the block-out time and is not affected by late or early operations.

Sit Pay Examples

A sit scheduled for 3:00 will receive 0:30 pay, no credit (3:00 - 2:00 = 1:00 / 2 = 0:30).

A sit scheduled for 1:45 that extends to 2:30 because of a late departure will not receive Sit Pay because the *scheduled* sit was less than 2 hours.

Extended Duty Period Pay (12 T.)

For unaugmented duty periods that extend beyond 10 hours, a pilot will receive 1:00 pay, no credit (in addition to all other pay) for every 1:00 of duty time in excess of 10 hours. Such pay will be calculated on the greater of scheduled or actual duty time, prorated on a minute-by-minute basis, for each duty period.

If the last flight of the duty period has an actual block less than scheduled block, the minutes under for that flight will be added to the release time for the day when computing the actual duty period.

EDP Example

	A Day	B Day	C Day
Scheduled Duty	10:00	11:00	7:00
EDP Pay (scheduled)	0:00	1:00	0:00
Actual Duty	10:30	10:45	7:30
EDP Pay (actual)	0:30	0:45	0:00

Total EDP for the rotation will be 1:30, which is the greater of scheduled or actual for each duty day.

Holiday Pay (3 K.)

A pilot who operates a rotation that touches one of the following holidays will receive additional ADG pay, no credit (in addition to any other form of pay) for each such day:

1. New Year's Eve
2. New Year's Day
3. Memorial Day
4. Independence Day
5. Thanksgiving Day
6. Christmas Eve
7. Christmas Day

A pilot will receive Holiday Pay regardless of whether or not their rotation contains a duty period on one of the above holidays.

Jetway Trades (23 BB.)

Jetway trades (JWT) allow a regular pilot to offer a part of their rotation, either from the beginning or from the end, for another regular pilot in their category to pick up. Contrary to what the term jetway "trade" might suggest, two pilots may not exchange portions of their respective rotations with each other. Jetway trades are one-way swaps only.

Effect on pay after a jetway trade:

1. No additional pay or credit will be generated by a jetway trade
2. The receiving pilot will receive:
3. Pay and credit for the value of the flights added to their schedule, plus
4. ADG Carveout Pay if they have accepted the end of an offering pilot's rotation that is scheduled to release 0000-0159, plus
5. Holiday Pay if they have accepted an *entire* duty period that touches a triggering holiday
6. The offering pilot's rotation will be reduced by
7. The value of the flights they give to the receiving pilot, plus
8. ADG Carveout Pay if they have given away the end of their rotation that is scheduled to release 0000-0159, plus
9. Holiday Pay if they have given away an entire duty period that touches a triggering holiday
Note: The offering pilot will retain any (other) non-flight time pay on their rotation.
10. Each pilot will receive per diem based upon their actual flying

For more details, see [Scheduling Alert 25-02](#).

International Pay (3 C.)

International Pay is \$6.50 for Captains and \$4.50 for First Officers. International pay is an hourly pay premium paid to a pilot for flight time in international operations—a segment to or from an airport, or between airports, located out of the contiguous United States, but excluding flights between the contiguous United States and Alaska. (*Section 3 A. 7.* and *Exception; Section 3 A. 8.*)

International pay does not show on your Time Card but it is displayed on your iCrew Pay Statement and Pilot Activity Statement.

Ocean Crossing Pay (3 J.)

Ocean crossing pay (*Section 3 A. 10.*) is an hourly pay premium paid to a pilot for flight time flown on an ocean crossing flight segment operated on any aircraft that does not pay the highest hourly rate under *Section 3 B. 2.*, provided there is a narrowbody category with an ocean crossing rotation published in the bid package for that month. The B-757 is not considered a narrowbody by the PWA. The hourly override for ocean crossing pay is defined in *Section 3 J.*, and is currently \$8.00 per hour for Captains and \$6.00 per hour for First Officers. For example, if the Company published an ocean crossing in the NYC320 bid package, all ocean crossings flown on B-767-300 and below will receive the ocean crossing hourly pay premium.

Ocean crossing segments between the U.S. mainland and Hawaii will not be considered for the purpose of triggering ocean crossing pay or receive ocean crossing pay. An ocean crossing flight segment operated on a narrowbody aircraft as a result of an unscheduled aircraft substitution (i.e., not published in the bid package) will receive ocean crossing pay. Such substitution does not trigger ocean crossing pay for any other aircraft.

How a Rotation Pays on Each Day

Paid the Day Of

The following parts of rotation pay are paid the day of:

1. Block
2. Minutes under
3. Duty period minimum (DPM)*
4. Duty period credit (DTY)*

*For daily pay calculations (e.g. carry out rotations, reserve green slip pay, TOFF pay), DPM and DTY are paid on the day they are earned. However, they are also soft credits that are included with other items on the last day of the rotation for reroute pay calculations. See the [Scheduling Reference Handbook](#) for more information on calculating reroute pay.

Paid the Last Day

The following parts of rotation pay are paid on the last day of a rotation:

1. Average daily guarantee (ADG)
2. Rotation credit (TRP)
3. Minimum calendar day (MCD)
4. All additional pay items, if applicable
5. ADG Carve Pay (CARVE)
6. Extended Duty Period Pay (EDP)
7. Holiday Pay (HOL)
8. Sit Pay (SIT)

Common Examples where Rotations are Paid by Day

There are numerous situations where a rotation is paid by day via various methods. Some examples include:

1. Reserve green slips flown over both X-days and on-call days
2. Reserve green slips paid under *Section 23 U. 1 c.* (when a long call reserve pilot is awarded a green slip that is within 18 hours of first attempted contact)
3. Reserve inverse assignments
4. Rotations that carry over to the next bid month

In each case, the appropriate method is applied to each day based on how the trip was placed on the pilot's schedule (green slip, white slip, etc.) and which type of line the pilot has (regular vs reserve) with all pay and credit or pay, no credit (as appropriate) in excess of flight time and duty period minimum applied to the last day.

RESERVE PAY

Reserve Line Guarantee (4 C.)

A pilot on reserve will receive a minimum guarantee that is based on the ALV. Reserve guarantee is a relatively complicated calculation that is not easily displayed on the pay information sources available to pilots (Time Card, iCrew Pay Statement, Pilot Activity Statement). The simplest way to think of reserve guarantee is as the *minimum dollar amount that is offset by the dollar amount of pay and credit assignments*. Calculations can get complicated in categories that have multiple pay rates. However, a reserve pilot who works a full schedule *will never receive less pay than the reserve guarantee in hours multiplied by the hourly rate of the highest paying aircraft model that all pilots in the pilot's category may be required to fly in that bid period*.

The number of hours of reserve guarantee is determined by subtracting 2 hours from the ALV, but no less than 72 hours and no more than 80.

Since the reserve line guarantee is only offset by pay and credit, any *pay, no credit items are paid above the reserve line guarantee* (above guarantee).

Examples

Reserve Guarantee With No Flying

ALV: 75:00; 75:00 - 2:00 = 73:00

ALV: 72:30; 72:30 - 2:00 = 70:30; Reserve guarantee will be the minimum 72:00

ALV: 83:45; 83:45 - 2:00 = 81:45; Reserve guarantee will be the maximum 80:00

The reserve guarantee above will be displayed in bid packets and on initial Time Card displays:

Category	ALV	LCW		RES	RES	EXTRA XDAY and	RLL

TEMP IN BANK		BANK ADJ		IN BANK		ALV	
0:00		0:00		0:00		79:02	
							ADDTL
DAY	ROT	BLOCK	SKED	PAY		PAY	LOG
DATE	DES	NBR	HRS	TIME	TIME	CREDIT	STAT
RES		OTHER	SUB TTL	PAYBACK	BANK OPT 1	TTL	BANK OPT 1
CREDIT	GUAR	GUAR	CREDIT	NEG BANK	AWD	CREDIT	LIMIT
0:00 +	77:02 +	0:00 =	77:02 -	0:00 +	0:00 =	77:02	82:00

While these displays show reserve guarantee in hours, the amount guaranteed is actually a dollar amount determined by multiplying the reserve guarantee hours by the hourly rate of the highest paying aircraft model that all pilots in the pilot's category may be required to fly in that bid period. Currently three categories have multiple pay rates: 220, 73N, and 320. In these categories, reserve pilots will receive reserve guarantee at the highest rate.

Reserve Guarantee Offset By Pay and Credit

All examples are a 12-year Captain using 1/1/2026 pay rates.

350, 74:00 reserve guarantee: $74:00 * \$483.74 = \$35,796.76$

73N, 72:00 reserve guarantee: 72:00 * \$390.30 = \$28,101.60

220, 76:30 reserve guarantee: 76:30 * \$374.66 = \$28,661.49

COMPENSATION REFERENCE HANDBOOK || **DELTA**

Over the course of the month, a pilot's reserve guarantee will be offset by all *pay and credit* assignments they receive. This information is shown on the Time Card *in hours*:

TEMP IN BANK		BANK ADJ		IN BANK		ALV	
0:00		0:00		0:00		77:45	
ADDTL							
DAY	ROT	BLOCK	SKED	PAY		PAY	LOG
DATE	DES	NBR	HRS	TIME	TIME	CREDIT	STAT
14APR	RES	SCC		1:00	1:00		CLSD
15APR	RES	SCC		1:00	1:00		CLSD
21APR	RES	SICK		8:25	8:25	8:25	CLSD
RES		OTHER	SUB TTL	PAYBACK	BANK OPT 1		TTL BANK OPT 1
CREDIT	GUAR	GUAR	CREDIT	NEG BANK	AWD	CREDIT	LIMIT
8:25 +	63:07 +	0:00 =	71:32 -	0:00 +	0:00 =	71:32	82:00

In categories with a single pay rate, the display in hours on the Time Card is equivalent to the actual dollar value of reserve guarantee. However, in a category with multiple pay rates, the display on the Time Card will not correct for offsets of assignments flown in aircraft paying a lower rate.

Reserve Guarantee Split Fleet Pay Credit Less Than Guarantee

A 12-year 737 Captain has a reserve guarantee of 72:00. They fly a 21:00 assignment that is entirely on 737-800 aircraft. Their Time Card will display:

CREDIT		RES GUAR		OTHER GUAR		TTL CREDIT
21:00	+	51:00	+	0:00	=	72:00

- Starting reserve guarantee: $72:00 * \$390.30 = \$28,101.60$
- Pay for 21:00 assignment in 737-800 aircraft: $21:00 * \$388.27 = \$8,153.67$
- Implied remaining RES GUAR: $51:00 * \$390.30 = \$19,905.30$
- This would give a total pay of $\$8,153.67 + \$19,905.30 = \$28,058.97$
- The actual value of the remaining 51:00: $\$28,101.60 - \$8,153.67 = \$19,947.93$
- Total reserve guarantee for the month is \$28,101.60

Reserve Guarantee Split Fleet Pay Credit Equal To Guarantee

A 12-year 737 Captain has a reserve guarantee of 72:00. They fly exactly 72:00 entirely on 737-800 aircraft. Their Time Card will display:

CREDIT		RES GUAR		OTHER GUAR		TTL CREDIT
72:00	+	0:00	+	0:00	=	72:00

- Starting reserve guarantee: $72:00 * \$390.30 = \$28,101.60$
- Pay for 72:00 assignment in 737-800 aircraft: $72:00 * \$388.27 = \$27,955.44$
- Implied remaining RES GUAR: $0:00 * \$390.30 = \0.00

DELTA || COMPENSATION REFERENCE HANDBOOK

- This would give a total pay of $\$27,955.44 + \$0.00 = \$27,955.44$
- The actual value of the remaining 0:00: $\$28,101.60 - \$27,955.44 = \$146.16$
- Total reserve guarantee for the month is \$28,101.60

International pay and ocean crossing pay are paid above reserve guarantee (**Section 4 C. 1. Note two and Note three**). They are essentially treated the same as other *pay, no credit* items, even on assignments that are *pay and credit*.

While reserve guarantee pay is not shown correctly on the Time Card, it is reflected correctly on the Pilot Activity Statement. The following example from March 2018 shows how reserve guarantee and international pay are actually calculated for a pilot's pay check.

Pay Summary

																	7:48			FLIGHT TIME PAY
																	2:42			AVG DAILY GUAR (PWA12J)
																	10:30			ROTATION PAY HOURS
																	26:42			TAFB CR
																	26:30		26:30	TAFB EX

- The ALV during this month was 76:30, resulting in a reserve line guarantee value of 74:30
- The 737-900 pay rate was \$257.87, resulting in a reserve guarantee of \$19,211.31
- The pilot also flew a total of 16:42 international pay (5:02 + 3:52 + 4:01 + 3:47 which includes the minutes under) at a rate of \$6.50, resulting in \$108.55. This pay is included on the FLIGHT TIME PAY lines for B737-900 and B737-800.
- Added to reserve guarantee, this results in a total pay of \$19,319.86
- Pay Hours and Amount Paid are subtracted from the initial reserve guarantee and the difference is shown on the RESERVE GUARANTEE line as 16:20 and \$4,249.39. The calculated value of this line, \$4,249.49 / 16:20 = \$260.17, does not correspond to any published pay rate and will vary each month based on how much flying is performed at pay rates that are less than the highest rate in category.
- Note that short call credit (SCC) in this example is pay and credit which was the case for 2018. SCC was changed to pay, no credit in Contract 2019.

Reserve Guarantee Split Fleet Pay Credit Above Guarantee

When a pilot accumulates credit hours above the reserve guarantee, there are two options to ensure the pilot is paid at least the reserve guarantee:

- When the dollar amount for the credit hours as flown at the applicable aircraft rate is above the reserve guarantee at the highest rate:
- The pilot is paid for the credit hours at the applicable aircraft rate flown (just as if they were a regular line holder)
- The reserve guarantee hours and dollar amount will be zero
- When the dollar amount for the credit hours as flown at the applicable aircraft rate is below the reserve guarantee at the highest rate:
- The reserve guarantee credit will be paid similar to the scenario where a pilot is below guarantee
- The reserve guarantee hours will be zero but the reserve guarantee dollar amount will be such that the pilot is paid the full reserve guarantee at the highest rate of their category

Reserve in an Anniversary Month

When on a reserve line during a pilot's anniversary month, the reserve line guarantee is prorated based on the number of days at their old rate and number of days at their new rate.

For example, a pilot with a hire date of December 10th, would have a reserve guarantee based on 9 days at their old rate and 22 days at their new rate. In this case, it does not matter if any long call or short call trips that are pay and credit are flown before or after the anniversary date. A green slip rotation would be paid based on the pilot's pay rate on the first day of the rotation and distributed training would be paid based on the pilot's pay rate on the day that the distributed training was completed.

Reserve Line Guarantee Changes

There are numerous instances where a reserve line guarantee will be changed from the basic calculation of ALV minus two hours, but no less than 72 hours and no more than 80 hours. The reserve line guarantee will be:

1. Reduced by a pro rata portion of the reserve guarantee for:
2. Each vacation day
3. Each CQ training day
4. Reduced by a reserve pro rata share for:
5. Each on-call day removed from a pilot's line after initial line awards due to an unpaid leave of absence (including a personal drop[s])
6. Each on-call day removed from a pilot's line after initial line awards due using an individual vacation day (IVD)
7. Note that the pilot will then receive pay, no credit for the value of a vacation day for each IVD awarded
8. Increased by a reserve pro rata share for each additional on-call day awarded
9. Increased by one hour each time the pilot is converted to an additional short call period (under *Section 23 S. 2. c. 2*)
10. Note that the pilot will also receive 2:00 pay, no credit per excess short call period, in addition to any other form of pay for the bid period

OTHER COMMON TYPES OF PAY

Per Diem (5 B.)

Per diem is an hourly meal allowance paid to pilots while assigned duty for the Company. The PWA defines different rates for domestic and international per diem. They are adjusted annually based on the US government Meal & Incidental Expenses (M&EI) rate as follows:

- Domestic per diem is 90% of a weighted average for the 10 mainland US cities with the most pilot layovers. For 2026, domestic per diem is \$3.30.
- International per diem is 60% of a weighted average of a blend of the top 5 cities in the Atlantic, Pacific, and Americas theaters. For 2026 international per diem is \$3.80.
- Calculated per diem rates are rounded up to the nearest whole \$.05.

Pilots are entitled to domestic per diem:

- From report at base until release at base while engaged in domestic operations
- While assigned to training within the 48 contiguous states of the United States in which the pilot is entitled to lodging under **Section 5 E**. For a pilot assigned to training away from base, time away from base will end when they block-in at their base.

Pilots are entitled to international per diem:

- From report at base until release at base while engaged in international operations. An international operation is a flight segment to or from an airport, or between airports, located outside the contiguous 48 states of the United States. A flight segment between an airport located in the mainland United States and Alaska will not be considered an international operation.
- While assigned to training located outside the 48 contiguous states. Time away from base will end when a pilot blocks in at their base.

Other per diem notes:

- Per diem for a rotation is paid in the second month for a trip that crosses two months
- A pilot assigned to training away from their base that includes a break in training of at least 48 hours will receive per diem for the time of such break if they notify the Company of their intention to remain at the training location during the break.
- A pilot who is eligible for a hotel while assigned to training at their base (i.e. ATL or SLC) will receive per diem beginning at 0000 hours on the first day of training and ending at 2359 hours on the last day of such training.
- A pilot undergoing training at their base will be eligible for a hotel if they undergo:
- Qualification training, including the night prior to the first day and the night after the last day.
- CQ, provided the pilot's permanent residence is more than 50 straight line statute miles from the training center.
- Recency with a briefing prior to 0900, provided the pilot's permanent residence is more than 50 straight line statute miles from the training center.
- Entry level pilots will receive 8 hours of domestic per diem during each day of training.
- A pilot who travels to training away from base will be considered to have traveled between their base and the training location for purposes of determining per diem.
- A pilot on an out-of-base white slip or green slip will receive per diem from report time until release time at the base where the rotation originates.

Deadheads (8 B., 8 C., and 8 D.)

A pilot who deadheads will be paid the hourly rate of this position they hold. If their position has more than one rate, they will be paid the rate for the aircraft model used on the first non-deadhead segment following the deadhead, or in the case of a deadhead ending a rotation, the rate of the aircraft model used on the last non-deadhead segment preceding the deadhead. A pilot will receive pay and credit for flight time for deadheads designated by the Company and will receive pay and credit for the *scheduled flight time* of an off-rotation deadhead.

A pilot who deadheads by surface transportation will be paid the amount listed in the applicable table in **Section 8 B. 3**. If the airport pairing is not listed, the pilot will be paid for travel time on a minute-by-minute basis at 25% of the second longevity step of the First Officer composite hourly rate for the greater of the lowest paying aircraft in service or the A-220-100 rate. A pilot who deadheads by surface transportation more than 30 miles before or after a military charter operation will be paid one hour of pay. It is important to note that surface transportation to or from an airport for the sole purpose of lodging is not a deadhead.

Ground Transportation to a Hotel Example

A pilot ends a duty period with a flight segment in DCA. The Company transports them by ground transportation to a hotel near IAD. The next duty period begins with a flight originating in IAD. This pilot *will not* receive pay for the ground transportation to the hotel.

Ground Transportation between Airports Example

A pilot has a flight segment that terminates in DCA. The Company transports them by ground transportation to IAD. The pilot then operates a flight segment originating out of IAD during the same duty period. This pilot *will* receive pay and credit in accordance with **Section 8 B. 3**.

Effect on Duty Rigs and Per Diem

When a pilot is assigned a duty period that begins with a deadhead by air transportation, their report time will be one hour prior to a deadhead on Delta or Delta Connection Carrier, and 90 minutes prior to an off-line deadhead segment other than a Delta Connection Carrier (**Sections 8 C. 1. and 2 A. 245**). When a pilot deadheads by surface transportation at the beginning of a duty period, their report time for the calculation of rotation credit and duty period credit will be the scheduled departure time of the surface transportation. When a pilot deadheads by surface transportation at the end of a rotation, their release for calculation of rotation credit and duty period credit will be extended by the travel times in **Sections 8 B. 3. and 8 B. 5.**, regardless of the actual travel time. This includes rotations that begin and end at different co-terminal airports under **Section 12 O. 2**.

Off-Rotation Deadhead

For pay and credit purposes, a pilot who utilizes an off-rotation deadhead will receive pay and credit at the applicable rate for the scheduled time of the scheduled deadhead segment(s).

For per diem purposes, when a pilot utilizes an off-rotation deadhead at the beginning of a rotation, the pilot's time away from base begins at their scheduled report under **Section 2 A. 245**. When a pilot utilizes an off-rotation deadhead at the end of a rotation, the pilot's time away from base will remain unchanged from the originally scheduled rotation.

Reroute Pay (23 L.)

A pilot will receive reroute pay in accordance with **Section 23 L**. For a full discussion of the calculation of reroute pay, please see the [Scheduling Reference Handbook](#). The display of reroute pay on a pilot's Time Card is discussed later in this handbook.

Payback Days and Supplemental Vacation (SUPP) Days

The [Scheduling Reference Handbook](#) discusses pay back days (PB) and supplemental vacation days (SUPP) at length. Please reference that document for detailed explanations on how they are used and how they pay.

Suit-Up Pay and Credit (4 H.)

A regular pilot or a long call reserve pilot will receive a minimum of two hours pay and credit if the pilot has not acknowledged their removal from a rotation or portion thereof, and reports for duty. A regular line holder will have suit up pay offset against their rotation guarantee. A pilot may with the concurrence of Crew Scheduling waive their rotation guarantee. Such pilot will no longer receive suit-up pay.

A short call reserve pilot will receive suit-up pay if they are removed from a rotation with less than 2 hours' notice by Crew Scheduling.

A reserve pilot will receive one hour of pay, no credit (called short call credit [SCC]) for each short call period completed during which the pilot does not perform any flying. This includes a pilot who is released early from a short call period by Crew Scheduling.

A reserve pilot will receive a minimum of two hours pay, no credit, be released from duty, and receive free of duty periods under **Section 23 S. 13.**, if the pilot has not acknowledged the removal from a rotation, and reports for duty (e.g., GS, IA) on an X-day.

Sick Leave (14 E.)

A pilot will receive pay and credit for sick leave in accordance with **Section 14 E.** For a full discussion of sick leave pay calculations and scenarios, please see the [Scheduling Reference Handbook](#). Generally speaking, sick leave will pay a regular pilot for the rotation guarantee value of assignments and will pay a reserve pilot the pro-rata share of reserve days. Sick leave is pay and credit, so it will offset reserve guarantee and apply to PWA flight time limits (such as the white slip pickup limit). Sick leave Time Card examples are provided later in this handbook.

Vacation (7 G.)

Each vacation year, a pilot is entitled to earned vacation days and bank hours.

A pilot will receive pay, no credit of 4:35 for each day of vacation.

There are rare instances discussed in the PWA where a pilot may receive pay from their vacation bank hours without using a day of vacation. When the pilot later uses those vacation days, they will not receive pay for vacation days in excess of their vacation bank hours. For more information please contact the Contract Administration (Enforcement) Committee.

Full Service Bank (12 N.)

The full service bank is a pay tool that allows a pilot to deposit and withdraw pay time in hours to be used for various scheduling purposes. All transactions in the full service bank are performed with *pay and credit*. Pay, no credit time cannot be deposited into the bank.

A positive bank balance may not exceed 60 hours and a negative bank balance cannot exceed 30 hours. A pilot may deposit credit from a bid period in excess of 80 hours into their full service bank. If a pilot's bank balance is negative, the first 5 hours of credit received in excess of 80 hours during a given bid period will be automatically applied toward the negative balance. A pilot may withdraw all or a portion of their full service bank and may borrow up to 20 hours in a given bid period for the purposes outlined below. (*Section 12 N. 1. - 3.*)

Credit hours deposited into a pilot's full service bank may be used to:

- Receive additional pay and credit up to the lesser of the average line value plus five hours, or 82 hours, except that a pilot may not withdraw more than five hours from their bank in any bid period in which the pilot is awarded a green slip
- Purchase up to 10 vacation days for use during the subsequent vacation year
- Purchase up to 10 vacation days for use during the current vacation year, by mutual agreement between the Company and the pilot (*Section 12 N. 4.*)

Please reference the [Scheduling Reference Handbook](#) for further details on purchased vacation days.

One of the most common usages of the full service bank is to make a withdrawal in order to meet the green slip trigger (*Section 23 U. 1.*). For example, assume a regular pilot had a total credit of 65 hours and the green slip trigger was 70 hours. If they were awarded a green slip with a value of 15 hours, the first 5 hours would be single pay and credit to reach the trigger, and the remaining 10 hours would be double pay, no credit, resulting in a total pay for the month of 90 hours. If the pilot elected to withdraw 5 hours from their bank to meet the trigger, they would start with a total credit of 70 hours and all 15 hours of the green slip would be double pay, no credit, resulting in a total pay of 100 hours. Taking into account that the pilot would either need a positive bank balance or would need to pay back the 5 hours in a future bid period, the withdrawal would result in an net extra 5 hours of pay.

A pilot's "carry-over rate" is defined as the dollar value of a pilot's accumulated credit for a bid period divided by the accumulated credit and is expressed in dollars per minute (*Section 2 A. 36.*). International pay and surface DH pay is included in this dollar value even though they are paid above the reserve line guarantee. All full service bank transactions are paid at the pilot's carry-over rate for the bid period in which the transaction occurs. (*Section 12 N. 6.*) The carry-over rate is displayed on the pilot's iCrew Pay Statement as well as on the pilot's Pilot Activity Statement. A pilot's carry-over rate is unrelated to having a rotation carry over from one month to the next.

Note that if a pilot does not have a current carry-over rate, due to being upon the sick list or otherwise in a non-pay status, the pilot's bank settlement will occur at the carryover rate which was last applied during active service.

Bank transactions must be submitted via iCrew (Pay/Hours -> Bank). Bank transactions will post on your Time Card, but do not process until the end of a bid period. If you would like to change a transaction submitted you can do so until the end of the bid period. A deposit of hours is processed before any other bank transaction initiated by the pilot. (*Section 12 N. 7. - 9.*)

Training (11 B.)

Qualification Training

A regular pilot assigned to qualification training will be paid the greater of rotations removed to accommodate training (including travel and FAR/PWA conflicts) or 3:05 at the highest rate shown on the pilot's line per day of training, including training days on which their schedule shows "OFF" (not scheduled to attend training). A reserve pilot or an unassigned pilot, while assigned to qualification training, will be paid and credited 3:05 for each training day, including training days on which their schedule shows "OFF" (not scheduled to attend training), at the rate of the highest paying aircraft model shown on their line or if they have not flown during the bid period, the rate used to establish their reserve guarantee or unassigned pilot guarantee. If training extends into two or more bid periods, a pilot will be paid based on the type of line they hold in each bid period.

A pilot assigned to Continuing Qualification (CQ) training that was scheduled prior to line awards will receive 5:00 pay, no credit for each training day. A reserve pilot will have their guarantee reduced by a pro-rata portion of the guarantee for each CQ training day. A pilot assigned to CQ training that was scheduled after initial line awards will receive the greater of 5:00 pay no, credit for each training day, or the value of rotations removed to accommodate CQ training.

Recency

A regular pilot scheduled for recency on their days off, or a reserve pilot designated by the Company for recency training will receive 5:00 of pay, no credit for each day of recency. A reserve pilot will have their guarantee reduced by a pro-rata portion of the guarantee for each on-call day they receive recency of experience pay. A regular pilot who is designated to satisfy their recency of experience requirement on a rotation that conflicts with a rotation on their line will be removed from such conflicting rotation, will be subject to **Section 4 F.** (Rotation Guarantee), and may be required to fly the balance of such removed rotation.

A pilot who has lost their recency due to their unavailability for any reason other than their illness will receive 5:00 pay, no credit for training to reestablish their recency and will have their guarantee reduced by a pro-rata portion of the guarantee for each on-call day beginning on the day they lost their recency and ending on the day it was reestablished if a reserve pilot and a regular pilot will not receive a rotation guarantee under **Section 4 F.** for any rotation removed from their line beginning on the day they lost their recency and ending at the time it was reestablished.

Operating Experience

A pilot who is assigned OE will be paid, at their election, the value of OE rotations flown, or the rotations removed to accommodate OE. If a pilot does not make an election, they will be paid the greater of the two.

Distributed Training

Distributed training is training that is accomplished without a classroom, instructor in a classroom, flight training device, flight simulator, or airplane. Distributed training includes training material the Company requires a pilot to complete that cannot be completed in conjunction with the normal course of preparing for flight. Pay for distributed training is the greater of 1 hour, or one minute of pay for every one-and-a-half minutes of runtime as determined by **Section 11 B. 9. b. - d.** For example, distributed training with a run time of 0:45 will receive 1:00 of pay, no credit and distributed training with a run time of 2:00 will receive 1:20 of pay, no credit. The most common types of distributed trainings are quarterly continuing qualification (QCQ) and systems distance learning prior to qualification training.

When a pilot completes distributed training during the pilot's anniversary month, the distributed training is paid using the pilot's pay rate on the day that the distributed training was completed.

Legal Duty Leave (13 E.)

Under **Section 13 A. 3.**, Legal duty is defined as participation by a pilot in a legal proceeding as a juror, or as a subpoenaed witness in criminal litigation or a legal or administrative proceedings arising out of their employment with the Company (not including proceedings under **Section 1, 16, 18, 19, or 27**). Jury duty is the most common legal duty.

The Company will provide legal duty leave to a pilot as follows:

- The pilot must *immediately* notify the Company and provide a copy of the summons upon receipt.
- The pilot will be placed on legal duty leave to participate in legal duty.
- The pilot will be paid and credited:
 - 5:15 per day of *scheduled legal duty leave*
- A regular pilot will receive the scheduled value of each rotation dropped for *unscheduled legal duty leave*.
- A reserve pilot will receive a reserve pro rata share for each on-call day lost to *unscheduled legal duty leave*.
- There is no pay for *unscheduled legal duty leave* placed on days off.
- If a pilot does not immediately notify the Company of legal duty they will be placed on unpaid legal duty leave.

Pay treatment for legal duty leave depends on pre-posted vs. post-award leave. Scheduled legal duty leave is reported by the pilot to the Company prior to the close of line bidding for the bid period in which the legal duty leave is scheduled to occur, and that the Company, at its discretion, places on the pilot's schedule prior to the close of line bidding for such bid period. Unscheduled legal duty leave is leave that the Company does not place on a pilot's schedule prior to the close of line bidding for the bid period in which the legal duty leave is scheduled to occur. In other words, scheduled legal duty leave is pre-posted leave in PBS, and unscheduled legal duty leave is placed on a pilot's schedule after lines are awarded.

The Company's common practice when receiving a summons from a pilot for jury duty in a future bid period is to post a single day of scheduled legal duty leave at the start of the jury duty. This day will pay 5:15 pay and credit and show as a preassigned activity in PBS. If the pilot subsequently is assigned to legal duty that conflicts with assignments after the single day of legal duty, they will be dropped and paid as provided by **Section 13 E. 3. b.** There is no pay for unscheduled legal duty leave that is placed on days off.

Entry Level Pilot Pay (3 D.)

An Entry Level Pilot is a pilot who has not completed their initial OE at the Company, e.g. a new hire (**Section 3 A. 5.**). Entry level pilots are paid 2:30 per calendar day (excluding days for which they are on an unpaid leave of absence) at the composite hourly pay rate established for the first-year longevity step beginning on their first day of employment with the Company as a pilot (**Section 3 D.**). After an entry level pilot completes OE, they will transition to regular flight pay. For more information, see the Entry Level Pilot Pay chapter of the Company's *New Hire Pilot Expanded Guidance* document located in AeroDocs on the EFB filed in each fleet's Training & Standards folder.

Expenses (PWA Section 5 and FOM 3.6.9.)

Pilots are reimbursed for expenses authorized by the PWA or other Delta corporate policy via direct deposit. These expenses are reimbursed after the pilot submits them via Concur. They are not displayed on any of the traditional pilot pay documents discussed in the next chapter. See the FOM and the [Concur for Pilots](#) link on Deltanet for helpful tips and timelines for submitting expenses. As of the time of this writing, Company policy is reimbursements must be submitted within 30 days of when the pilot made the payment.

Profit Sharing (3 /.)

Profit sharing is paid annually on February 14th. The payment is displayed on a separate Delta Pay Statement (pay stub). The Contract Administration (Enforcement) Committee publishes detailed information on profit sharing each year via a Contract Awareness Bulletin. For 2024 profit sharing payout information that was paid on February 14, 2025, see [Contract Awareness Bulletin 25-04](#).

VIEWING YOUR PAY

When viewing your pay, there are at least five documents you need to review:

- iCrew Rotation Display
- iCrew Time Card
- iCrew Pay Statement
- Pilot Activity Statement
- Delta Pay Statement (pay stub)

iCrew Rotation Display

Rotations can be displayed in iCrew in several ways:

- Airplane logo on “My Schedule,” “Future Schedule,” or any monthly schedule display
- Airplane logo on “Open Time” rotation list
- Pre-Flight Menu → Rotation → enter rotation information manually
- Pre-Flight Menu → Pilot Names → enter flight information manually
- Daily Trip Coverage
- Pre-Flight Menu → Archived Rotation → enter rotation information manually

Archived Rotation View

The archived rotation is generally the best resource for determining rotation pay. It removes extraneous information that does not directly apply to pay such as hotels and flight duty period limits. The archived rotation is also the only way to view rotation information after approximately 60 days.

Rotation Examples

Archived Rotation Display Example

								TAFB 76.23EX	
0.00	HOL	0.00	CARVE	0.16	SIT	2.35	EDP		

The total pay for a rotation is the sum of:

- The pay and credit for the rotation (same for both regular and reserve and annotated with TL)
- Additional pay items, if applicable (HOL, CARVE, SIT, and/or EDP)
- Reroute pay, if applicable. This will be shown on the pilot's Time Card instead of the rotation.

The total pay and credit for a rotation is defined in **Section 12 L**, and discussed earlier in this document in the [Rotation Pay chapter](#). There is no specific indication in iCrew which of the pay treatments (ADG, TRP, etc.) is the controlling factor for a particular rotation. The following examples show rotations that are paid based on each pay treatment.

Average Daily Guarantee (ADG) Example 1

Rotation 7479 is a 4-day rotation. Under *Section 12 I*, this trip will pay a minimum of 21:00 (four times 5:15). The pay is broken down into 16:35 block, plus 3:41 trip credit, and the remaining 0:44 ADG. On the summary line the total block time is listed as 16:35, and "4.25CR" is the total of the 3:41 trip credit plus 0:44 ADG.

Rotation 6875 is a 4-day rotation. Under **Section 12 K.**, 22:03 because of the total time away from base of 77:12 ($77:13 / 3.5 = 22:03$). The pay is broken down into 18:55 block, plus 0:21 minimum calendar day, and the remaining 2:47 trip credit. On the summary line the total block time is listed as 18:55, and "3.08CR" is the total of the 0:21 minimum calendar day plus 2:47 trip credit.

Rotation 4594 has a report time of 0639 and a release time of 1524 on the 7th, for a duty day length of 8:45. Under **Section 12 J.**, the 7th will pay a minimum of 4:23 (8:45 / 2 = 4:23). This total pay for this day is shown as “4.23TL.” The 4:23 is broken down into 3:11 block, 0:54 deadhead, and 0:18 duty period credit.

Rotation 4795 has a report time of 1747 Eastern on the 3rd and a release time of 0029 central on the 4th. This is a total duty day of 7:42 (0029 central = 0129 eastern; 0129 - 1747 = 7:42). However, because this duty period extends past 2200 pilot's base time, there are two calculations to determine the duty period credit under **Section 12 J**. From 17:47 through 21:59, the duty period credit is 1 for 2, resulting in a duty period credit of 2:07 (21:59 - 17:47 = 4:13; 4:13 / 2 = 2:07). From 2200 until 01:29, the duty period credit is 1 for 1 ½, resulting in a duty period credit of 2:19 (01:29 - 22:00 = 3:29 * 2/3 = 2:19). The total duty period credit is 2:07 + 2:19 = 4:26, shown as "4.26TL." The 4:26 is broken down into 3:46 block and 0:40 duty.

Duty Period Minimum (DPM) Example

Rotation P171 has two days containing less than 2:00 of credit, the 22nd and the 26th. Because this rotation contains an ocean crossing, the 2:30 minimum calendar day in **Section 12. U.** does not apply. Under **Section 12 H.**, the 22nd and 26th will receive a minimum credit of 2:00. This is displayed as "0.06DPM" on the 22nd (1:54 block + 0:06 DPM = 2:00), and "0.16DPM" on the 26th (1:44 block + 0:16 DPM = 2:00). The total pay for the trip is 29:43 block time plus 0:22 Credit from the DPM.

Rotation 3056 has no credit time associated with May 3. Under **Section 12 U.**, the 3rd will still receive a minimum calendar day of 2:30, this is shown as “2.30MCD.” The 2:30 MCD is included as part of the 3:04 of credit on the summary line. Because the total credit is less than 15:45, the trip pays based on ADG for 3 days, and the MCD essentially offsets the ADG.

The last leg of rotation 3428 departs at 2230 on the 5th. Because the block out time is on the 5th, all time associated with that leg is counted on that day. The rotation releases after midnight on the 6th, triggering a 2:30 MCD for that day. This is shown as "2.30MCD." The 2:30 MCD is included as part of the 3:42 of credit on the summary line.

Rotation 4479 has two sits longer than 2 hours: 2:26 between flight 515 and flight 434 on the 16th, and 2:24 between flight 2551 and flight 535 on the 18th. Under **Section 12 S.**, scheduled sits longer than 2 hours will receive 1 minute of pay, no credit for each 2 minutes of sit in excess of 2 hours. This results in a total sit pay for the rotation of 0:25 (2:26 - 2:00 = 0:26 / 2 = 0:13; 2:24 - 2:00 = 0:24 / 2 = 0:12; 0:13 + 0:13 = 0:25). This is shown as "0.25 SIT," and will be displayed in the "ADDTL PAY ONLY" column on the pilot's Time Card.

Scheduled credit for Rotation C469 is the greater of:

- ADG (*Section 12 I.*) - Three days pays 5:15 * 3 = 15:45
- Rotation credit (*Section 12 K.*) - TAFB 64:08 / 3.5 = **18:19**
- The sum, on a duty period basis, of the greater of duty period credit (*Section 12 J.*), DPM (*Section 12 H.*), or the scheduled flight time for each duty period:
 - A-day - flight time 4:04
 - B-day - flight time 7:39
 - C-day - flight time 2:54
 - Total 14:37
- The sum, on a daily basis, of the greater of duty period credit (*Section 12 J.*), DPM (*Section 12 H.*), minimum calendar day (*Section 12 U.*), or the scheduled flight time for each duty period:
 - A-day - flight time 4:04
 - B-day - flight time 7:39
 - C-day - flight time 2:54
 - Total 14:37
- The greatest of the above treatments is rotation credit 18:19. This is displayed on the rotation as a total of 18:19, broken into 14:37 block and 3:42 credit, all of which is 3:42 Trip Credit.

Scheduled Pay only items for Rotation C469 are:

- Holiday Pay (*Section 3 K.*) - 0:00
- ADG Carveout Pay (*Section 12 I.*) - 0:00
- Sit Pay (*Section 12 S.*) - Scheduled 2:09 sit between flight 1833 and flight 1636 on B-day; 2:09 - 2:00 = 0:09 / 2 = 0:04.5 = **0:05**
- Extended Duty Period Pay (*Section 12 T.*) - B-day has a duty length of 11:18; 11:18 - 10:00 = **1:18**

Scheduled vs Actual Rotation Example 1 - Actual

								TAFB	63.55EX
0.00	HOL	0.00	CARVE	0.05	SIT	1.41	EDP		

Actual pay and credit for Rotation C469 is the greater of:

- ADG (*Section 12 I.*)- Three days pays 5:15 * 3 = 15:45
- Rotation credit (*Section 12 K.*) - TAFB 64:08 / 3.5 = **18:19**
- The sum, on a duty period basis, of the greater of duty period credit (*Section 12 J.*), DPM (*Section 12 H.*), or the scheduled flight time for each duty period:
 - A-day - flight time 4:22 (4:22 Block)
 - B-day - flight time 7:39 (7:21 Block plus 0:18 minutes under)
 - C-day - flight time 2:54 (2:45 Block plus 0:09 minutes under)
 - Total 14:55
- The sum, on a daily basis, of the greater of duty period credit (*Section 12 J.*), DPM (*Section 12 H.*), minimum calendar day (*Section 12 U.*), or the scheduled flight time for each duty period:
 - A-day - flight time 4:22 (4:22 Block)
 - B-day - flight time 7:39 (7:21 Block plus 0:18 minutes under)
 - C-day - flight time 2:54 (2:45 Block plus 0:09 minutes under)
 - Total 14:55
- The pay and credit as constructed = **18:19**

The greatest of the above treatments is pay and credit as constructed driven by the rotation credit 18:19. This is displayed on the rotation as a total of 18:19, broken into 14:28 block, 0:27 minutes under, and 3:42 credit, all of which is 3:42 TRP Credit.

Actual Pay only items for Rotation C469 are:

- Holiday Pay - 0:00

ALPA COMPENSATION REFERENCE HANDBOOK

DELTA

- ADG Carveout Pay - 0:00
- Sit Pay - **0:05** because sit pay is scheduled only, there is no adjustment due to the actual sit of 2:50
- Extended Duty Period Pay - B-day has a duty length of 11:41; Report time 1235, Release time 0016 (2341 block in + 30 debrief + 5 minutes under) 11:41 - 10:00 = **1:41**

NOTES:

- Because rotation credit is the controlling pay treatment, it offsets the additional actual block time, resulting in no extra pay.
- If the last flight segment had arrived after scheduled block in time (including minutes under), the pilot would receive an additional minute of pay for each 3.5 minutes late.

Scheduled vs Actual Rotation Example 2 - Scheduled

								TAFB 86.32EX	
0.00	HOL	0.00	CARVE	0.00	SIT	4.55	EDP		

Actual pay and credit for Rotation C456 is the greater of:

- ADG (*Section 12 I.*) - Four days pays 5:15 * 4 = 21:00
- Rotation credit (*Section 12 K.*) - TAFB 86:32 / 3.5 = **24:43**
- The sum, on a duty period basis, of the greater of duty period credit (*Section 12 J.*), DPM (*Section 12 H.*), or the scheduled flight time for each duty period:
 - A-day - flight time 6:46 (6:46 Block)
 - B-day - flight time 4:49 (4:36 plus Block 0:13 minutes under)
 - C-day - flight time 5:06 (4:58 plus Block 0:08 minutes under)
 - D-day - flight time 7:18 (7:18 Block)
 - Total 23:59

- The sum, on a daily basis, of the greater of duty period credit (*Section 12 J.*), DPM (*Section 12 H.*), minimum calendar day (*Section 12 U.*), or the scheduled flight time for each duty period:
- A-day - flight time 6:46 (6:46 Block)
- B-day - flight time 4:49 (4:36 plus Block 0:13 minutes under)
- C-day - flight time 5:06 (4:58 plus Block 0:08 minutes under)
- D-day - flight time 7:18 (7:18 Block)
- Total 23:59
- The pay and credit as constructed = 23:05

The greatest of the above treatments is the actual rotation credit 24:43. This is displayed on the rotation as a total of 24:43, broken into 23:38 block, 0:21 minutes under, and 0:44 credit, all of which is 0:44 TRP Credit.

The pilot will also receive \$32.66 pay on their iCrew Pay Statement included in the value of the rotation for the ground deadhead in accordance with *Section 8 B. 3.*

Actual Pay only items for Rotation C456 are:

- Holiday Pay - 0:00
- ADG Carveout Pay - 0:00
- Sit Pay - 0:00
- Extended Duty Period Pay
- A-day has a duty length of 10:23; Report time 0600, Release time of 1623 (1553 block in + 30 debrief) 10:23 - 10:00 = 0:23
- D-day has a duty length of 14:32; Report time 0600, Release time 2032 (1917 block in + 30 debrief + 0:45 ground transportation LGA-JFK) 14:32 - 10:00 = 4:32
- 0:23 + 4:32 = **4:55**

NOTES:

- Because rotation credit is the controlling pay treatment, it offsets the additional actual block time, resulting in no extra pay
- This rotation reported in JFK and released in LGA so duty time and EDP is calculated using the values in *Section 8 B. 3.*, in this case 0:45
- The pilot was rerouted from Flight 2623 to Flight 2396. This will trigger reroute pay as follows:
- *Section 23 L. 4.* reroute pay - The last leg, plus all trip credit will receive one-half pay, no credit. 3:11 Block + 0:44 TRP = 3:55 / 2 = 1:57.5 = 1:58 RRPY.
- *Section 23 L. 8.* reroute pay - If this reroute was not covered by the weather or airport closure exceptions, the last duty period will be paid as single pay, no credit. 7:18 TL + 0:44 TRP = 8:02 reroute pay.

Actual pay and credit for Rotation 3374 is the greater of:

- ADG (*Section 12 I.*) - Three days pays 5:15 * 3 = 15:45
- Rotation credit (*Section 12 K.*) - TAFB 54:42 / 3.5 = 15:38
- The sum, on a duty period basis, of the greater of duty period credit (*Section 12 J.*), DPM (*Section 12 H.*), or the scheduled flight time for each duty period:
- A-day - flight time 4:32 (4:18 Block plus 0:14 minutes under). Because of the additional block time, A-day no longer pays on duty period credit.
- B-day - duty period credit 3:39. Because the actual duty day for this day was shorter than scheduled, it pays the scheduled credit of 3:39.
- C-day - flight time 9:14 (2:10 DH plus 6:26 Block plus 0:38 minutes under)
- D-day - no pay for this day as MCD only applied to the calendar day calculation below.
- Total 17:25
- The sum, on a daily basis, of the greater of duty period credit (*Section 12 J.*), DPM (*Section 12 H.*), minimum calendar day (*Section 12 U.*), or the scheduled flight time for each duty period:
- A-day - flight time 4:32 (4:18 Block plus 0:14 minutes under). Because of the additional block time, A-day no longer pays on duty period credit.
- B-day - duty period credit 3:39. Because the actual duty day for this day was shorter than scheduled, it pays the scheduled credit of 3:39.
- C-day - flight time 9:14 (2:10 DH plus 6:26 Block plus 0:38 minutes under)
- D-day - 2:30 minimum calendar day. Flight 1438 releases after midnight triggering the MCD.
- Total **19:55**

- The pay and credit as constructed = 16:00

The greatest of the above treatments is the sum of the duty period credits, minimum calendar day, and flight time for 19:55. This is displayed on the rotation as a total of 19:55, broken into 13:17 block, 1:02 minutes under, and 5:36 credit (2:30 from MCD, 2:10 from DH, and 0:56 DTY).

Actual Pay only items for Rotation C456 are:

- Holiday Pay - 0:00
- ADG Carveout Pay - 2:00 because the rotation releases between midnight and 0200
- Sit Pay - 0:08 because sit pay is scheduled only, there is no adjustment due to the actual sit of 2:19
- Extended Duty Period Pay - C-day has a duty length of 12:48. 1114 report, 0002 release; 12:48 - 10:00 = 2:48.

iCrew Time Card Parts Explained

The iCrew Time Card presents a current snapshot of pay items for a bid period. You can access your Time Card for the current bid period by clicking the “Time Card” link at the bottom of the main menu. Time Cards for specific months are available in iCrew (Pay/Hours -> Time Card) with recent bid periods available in a drop down menu, or you can manually type a bid period in and click on “Display/Print Time Card.” Time Card data is available for up to the previous five years.

14APR	REG	ALPA					
16APR	REG	C469	14:28	18:19	18:19	18:19	1:46

Rotation C469 was awarded to a regular pilot as a pay and credit assignment, e.g. PBS award, white slip, swap with the pot, or pilot-to-pilot swap board. The rotation starts on 16APR, contains a total block time of 14:28, had a scheduled total time of 18:19, actual pay time of 18:19, credit time of 18:19, and additional pay items totaling 1:46. The pilot will receive a total of 18:19 *pay and credit* and 1:46 *pay, no credit* for this rotation.

CQ Training

CREDIT APPLICABLE TO REG G/S SLIP PAY:					69:25	REG G/S TRIGGER:		

This pilot had 7 days of vacation from 11AUG through 17AUG. They received 22:40 of *pay*, *no credit*. Also, under **Section 23 U. 1. a. Note**, vacation time is counted towards the regular pilot green slip trigger. On the credit summary, the pilot only has 39:40 of total credit, but the credit applicable to regular green slip pay includes the value of the vacation and is 69:25.

VAC TIME IN	VAC DAYS IN	VAC PAYOFF	VAC TIME OUT	VAC DAYS OUT
63:45	15	0:00	34:00	8

The vacation days summary for this pilot also shows the change in vacation during the month. They started the month with 63:45 and 15 days, so using 7 days and 29:45 left them with 34:00 and 8 days remaining.

Vacation - Reserve Pilot

TEMP IN BANK		BANK ADJ		IN BANK		ALV			
0:00		0:00		0:00		72:30

0:00 +		39:29 +		0:00 =		39:29 -		0:00 +	
0:00 =		39:29		77:30					

This pilot received a reserve line and had 14 days of vacation worth 64:10. The vacation is displayed on their Time Card as 64:10 of *pay, no credit*. In accordance with **Section 4 C. 1. Exception one** and **Section 7 G. 2. Note**, when a reserve has vacation their availability and reserve guarantee is prorated. In this case, the pilot's prorated reserve guarantee is 39:29. This makes the total pay for the month 103:39.

Individual Vacation Day

Display of an individual vacation day on a pilot's Time Card will be identical to the display of an awarded vacation day. However, the overall effect on pay is slightly different. Under **Section 7 I.** and **Section 23 I. 11.**, an IVD will drop an underlying trip assignment or reserve days. The pilot will lose the pay and credit for the assignment or the pro rata share of the reserve on-call days and then be paid for the value of a vacation day for each IVD awarded.

Payback Days

DATE	DAY	ROT	BLOCK	SKED	PAY	CREDIT	ADDTL PAY ONLY

ADDITIONAL ON-CALL-DAYS : 0								

This pilot was awarded 0607 on 31MAR as a green slip. The 2-day trip carried into the April bid period, with 2:11 of pay associated with 31MAR. Because the pilot's credit was below the green slip trigger (58:25 credit, 70:45 trigger), the 2:11 is shown as "G/SLIP CREDIT" and will be single pay and credit in addition to the total credit from above, bringing the total pay for the month to 60:36 (58:25 + 2:11). The remainder of the green slip will pay in the following month even though the full value of the trip shows in the PAY TIME column of this month.

This is the April Time Card for the same pilot who was awarded 0607 as a green slip on 31MAR. The total pay of the trip is 10:30 which is displayed on their March Time Card. Because the full value was displayed in the month prior, TRANS shows on the carry in month Time Card in the SKED TIME and PAY TIME columns. The pilot's credit applicable to green slip pay is 64:16 and is less than the green slip trigger of 67:00. As a result, the first 2:44 of the trip will pay as "G/SLIP CREDIT" (single pay and credit in addition to the total credit from the month). The remaining 5:35 (10:30 - 2:11 in March - 2:44 towards the green slip trigger in April) from the trip will be displayed as "G/SLIP PAY" (which is double pay, no credit). The total pay for the trip during April is $2:44 + 2 * 5:35 = 13:54$.

----	-----	-----			-----	-----		
#1	1	FILL CURRENT MONTH			2:44	2:44		
PREVIOUS 12 MONTHS SHORTAGE AFTER BANK PROCESSING :						0:00		

This is the Time Card for the same pilot after a full service bank transaction. The pilot elected to withdraw 2:44 from their full service bank in order to reach the green slip trigger. This results in a reduction in their bank balance of 2:44, and now the entire 8:19 of the portion of the trip in this month will pay as "G/SLIP PAY" (double pay, no credit). Including the bank transaction, the pilot's pay for the trip is $2:44 + 2 * 8:19 = 19:22$. Even after taking into consideration reimbursement of the 2:44 back into the full service bank in the future ($19:22 - 2:44 = 16:38$), the bank transaction has netted a 2:44 increase in total pay ($16:38 - 13:54 = 2:44$).

This pilot was awarded 4816 on 02MAR as an inverse assignment. The trip will pay 6:18 of *double pay*, *no credit*, as shown in the assignment summary and listed as “ASSIGN PAY.” The total pay for the trip is 12:36.

Inverse Assignment - Reserve Pilot

Inverse assignments for reserve pilots pay, and display on the Time Card, the same as reserve green slips. See the Green Slip - Reserve Pilot example earlier in this section for more information.

The Time Card above shows an example of a pilot placing a bank request to fill their current month. They started the month with a bank balance of 12:46. Towards the bottom of the Time Card you can see the request to fill their current month with up to the full 12:46 balance. According to **Section 12 N. 4. a. Exception**, pilots withdrawing from the bank are limited to receiving additional credit up to the lessor of ALV+5 or 82 hours (and no more than 5 hours in a month with a green slip). This limit is shown as “BANK OPT 1 LIMIT.” In the example above, the limit is 76:00 = 71:00 ALV + 5:00. Because the pilot’s total credit before the bank transaction is 71:02, they are limited to a bank withdrawal of 4:58. This amount is also shown as “TTL BANK OPTS AWARD 4:58” and “AWARD AMOUNT 4:58” and the pilot’s outgoing bank balance is now 7:48 (12:46 - 4:58 = 7:48).

INDIVIDUAL VACATION DAYS AVAILABLE: 5				
INDIVIDUAL VACATION OCCASIONS AVAILABLE: 1				

The Time Card above shows an example of a pilot depositing time into their bank. They started with a negative bank balance of -4:15. On the credit summary line, there is an automatic payback of a negative balance with up the first 5 hours of credit that exceeds 80 hours (*Section 12 N. 3. b.*). In this case, 4:15 is subtracted from the pilot's credit to pay back the negative balance. The total credit is now 92:50 = 97:05 - 4:15. Additionally, the pilot has requested a bank deposit of 12:46, and the full amount was awarded. The pilot's outgoing bank balance is then displayed "OUT BANK 12:46." The amount of pay that the pilot will receive in their pay check is 80:04 (92:50 - 12:46).

Distributed Training

VAC TIME IN	VAC DAYS IN	VAC PAYOFF	VAC TIME OUT	VAC DAYS OUT
4:15	1	0:00	4:15	1
23JAN25 QCQ9 DISTRIBUTED TRNG PAY: 1:13				
AUTHORIZED PERSONAL DROP AVAILABLE FOR USE: Y

25MAR	REG	3557	5:22	10:30	10:30	10:30	
28MAR	REG	SICK			9:33	9:33	

Sick leave will display as a line item of *pay and credit*. In this instance, a regular pilot was sick for a day trip on 28MAR. The total value of the trip was 9:33, which is displayed on the last line of the Time Card. Under **Section 4 F. 1. Note**, some additional pay only items are part of rotation guarantee and will be included in the sick leave used. For example, a trip that had a pay and credit value of 7:00 and EDP pay of 0:45, would display as 7:45 of *pay and credit* if the pilot was sick.

This pilot had the following pay and credit assignments:

- Rotation 3414: 15:45
- Rotation 3378: 11:33
- Sick call 17SEP: 14:03 + 13:22
- Rotation C419: 16:03

The total of these assignments is 70:46, which is displayed on the credit summary line.

The pilot also had CQ training (44WD) assigned on 11SEP, 15:00 of *pay, no credit*. Under **Section 23 U. 1. a. Note**, CQ training is counted towards the regular pilot green slip trigger, so the value is added to the 70:46 credit total and shown as 85:46 credit applicable to regular green slip pay.

The pilot was assigned a green slip rotation 0051 on 28SEP worth 11:09. Because their credit applicable to green slip pay (85:46) exceeded the regular pilot green slip trigger (67:00), all of this pay is listed in the G/SLIP PAY line and will be *double pay, no credit*.

Several of the assignments also had additional pay only items totaling 7:41 (0:13, 3:00, 2:42, 1:46). This will be added to the pilot's total pay.

The pilot will receive:

- Pay and credit total: 70:46
- CQ: 15:00
- Addtl pay only: 7:41
- Green slip: 2 * 11:09 = 22:18
- TOTAL PAY: 115:45

This pilot was on reserve and had the following pay and credit assignments:

- 0068 01DEC: 21:37

- 0531 06DEC: 5:15
- 0581 08DEC: 15:45
- 6854 11DEC: 16:32
- 6621 15DEC: 15:55
- 6980 18DEC: 15:45

The total of these assignments is 90:49, which is displayed on the credit summary line. The ALV for the month was 79:00, resulting in a reserve guarantee of 77:00. Because the pilot credited more than the guarantee, they will receive the full amount of pay and credit that they flew with no additional reserve guarantee.

The pilot completed one short call period where they did not perform any flying. This short call credit has a value of 1:00 *pay, no credit* and is shown along with the date it occurred as SCC.

The pilot was assigned the following green slip rotation, entirely on X-days:

- 6944: 21:00

The reserve green slip value of 21:00 is *single pay, no credit*. This amount is shown on the “RES ASSIGN-G/SLIP PAY” line. Because this is *pay, no credit*, it will pay above the total credit received.

The pilot also received 4:30 of reroute pay under **Section 23 L. 4.**, shown on the “RRPY” line below rotation 6944 and 10:53 of reroute pay under **Section 23 L. 9.**, shown on the “REROUTE PAY” line. These are both *single pay, no credit* and will be added to the pilot’s total pay.

Finally, several of the assignments had additional pay only items totaling 5:07 (0:17, 1:39, 3:11). This will also be added to the pilot’s total pay.

The pilot will receive:

- | | |
|--------------------------|--------|
| • Pay and credit total: | 90:49 |
| • Short call credit: | 1:00 |

This pilot was on reserve and had the following pay and credit assignment:

- ALPP 03JUN: 31:30

The ALV for the month was 82:00, resulting in a reserve guarantee of 80:00. The 31:30 pay and credit is offset against that reserve guarantee. The credit summary line shows the 31:30 credit plus the remaining 48:30 reserve guarantee for a total credit of 80:00.

The pilot was assigned the following green slip rotations, entirely on X-days:

DELTA || COMPENSATION REFERENCE HANDBOOK

- C497: 22:06
- 3408: 22:06
- C450: 16:01

These rotations are worth a total of 60:13 *single pay, no credit*. This amount is shown on the “RES ASSIGN-G/SLIP PAY” line. Because this is *pay, no credit*, it will pay above the total credit received.

The pilot will receive:

- Pay and credit total: 80:00
- Green slip: 60:13
- TOTAL PAY: 140:13

This pilot was on reserve and had the following pay and credit assignments totaling 61:34:

- L071: 23:19
- 0429: 11:49
- 9545: 26:26

The ALV for the month was 73:45, resulting in a reserve guarantee of 72:00. The 61:34 pay and credit is offset against that reserve guarantee. The credit summary line shows the 61:34 credit plus the remaining 10:26 reserve guarantee for a total credit of 72:00

Two of the assignments also had additional pay only items totaling 3:09 (2:04, 1:05). This will be added to the pilot's total pay.

The pilot will receive:

- Pay and credit total: 72:00
- Addtl Pay Only: 3:09
- TOTAL PAY: 75:09

iCrew Pay Statement

The iCrew Pay Statement is an all-inclusive pay summary generated after the close of payroll, generally early in the month. It is available on the 15th of the follow month at (iCrew -> Pay/Hours -> Pay Statement). For example, the May 2025 iCrew Pay Statement is available on June 15, 2025. Data for the iCrew Pay Statement is transferred directly from the Time Card. Generally speaking, if a pilot's Time Card is correct, their iCrew Pay Statement will also be correct.

Bid Period Begin Date: 02MAR25 (ddmmmyy)

(Defaults to most recently issued statement)

To display in a scroll box for a printer-friendly version, enter 'H': ☐

To view retro Pay Data beginning with input bid period, enter 'Y': ☐

To view an iCrew Pay Statement, type in the applicable bid period. iCrew Pay Statements are available in iCrew for at least 10 years. The statement is easiest to view in the printer-friendly version selected by entering "H" in the applicable box. The non-printer-friendly version contains additional line item information that will be discussed later in this handbook. The retro pay data is no longer used.

iCrew Pay Statement Parts Explained

Header

DISPLAY PILOT PAY STATEMENT									
* FINAL *									
NAME:		EMPLOYEE-NBR:		AIR LN:	DL	CAT:	NYC 73N A		
SEN DTE:						STMT PAY PD:	01DEC19		
IN BANK:		IN C/O:		RATE:	0.000000	PAY:	.00		
PAY/CRD:	67:25	PAY/CRD PAY:	\$ 18,577.61	CUR C/O RATE:	4.592734				

The header contains:

- Name
- Employee number
- Category
- Pilots in a pay protected position (seniority list instructors, training bypass, chief pilots, duty pilots, etc.), will see their pay protected category above their actual category
- Seniority date
- Pay Period
- Starting Bank
- Total credit
- Total pay from credit (which includes international pay and surface DH pay)
- Carry-over rate (in dollars per minute)

Assignment Information

LOG DTE	LOG ID	PAY CDE	FLT HRS	CRD HRS	UNSK DHD	NITE HRS	INTL HRS	SRF DHD	TOTAL PAY
01DEC	VAC *	43	26:15						\$ 7,065.19
08DEC	C405	79	2:48						\$ 757.01
		42	4:30				4:30		\$ 1,240.42
09DEC		35	5:03				5:03		\$ 1,402.73
		79	4:09			1:18			\$ 1,130.96
10DEC		42	1:56						\$ 524.46
14DEC	4F1R	43	10:30						\$ 2,848.34
19DEC	C542	79	19:54			1:50	17:38		\$ 5,537.77
22DEC		42	3:42	2:39		3:42			\$ 1,722.57
30DEC	C534	79	12:14				12:14		\$ 3,413.35
.....									
SUB	TOTALS		64:46	2:39		6:50	39:25		\$ 25,642.80

For each assignment on a pilot's schedule the summary contains:

- Date
- Assignment Identifier (trip number or other code) – Note that the asterisk (*) next to the assignment identifier signifies the pay on that line is pay, no credit
- Pay department code - Categories with multiple pay rates have different pay codes for each rate
- Actual block hours including deadheads and minutes under
- Credit hours – For purposes of the iCrew Pay Statement, the time in the credit hours column is the credit value of the rotation in excess of flight time, block time, and minutes under (ADG, TRP, etc.).
- Night hours – This is no longer used for pay calculations
- International hours
- Surface deadhead hours
- Total pay in dollars – Total pay is calculated by converting each column's time to minutes and multiplying the minutes by your pay rate per minute (that rate was rounded to six decimal points). These dollar amounts are added together to get the total pay for that line.
- Subtotal of all above pay items

Note that while time from the ADDTL PAY ONLY column on the Time Card is not displayed on the iCrew Pay Statement, it is still accounted for when calculating the dollar amount in the TOTAL PAY column of the iCrew Pay Statement.

Reserve Guarantee

RES GUARANTEE	33:30		\$ 10,916.31
			

As discussed earlier in the [Reserve Pay chapter](#), the hours for the reserve guarantee will start the month at the pilot's full reserve line guarantee and then be reduced by all *pay and credit* assignments. The final dollar amount for the reserve guarantee is calculated so that the full reserve line guarantee is paid at the highest pay rate for those categories with multiple pay rates.

Other Pay

Administrative Guarantee

ADM GUARANTEE	90:06		\$ 32,447.71
---------------	-------	-------	--------------

Pilots in certain positions with a guaranteed amount of pay or an override will see ADM GUARANTEE below the subtotal from the Assignment Information section. The amount of hours and dollars is unique to their position and is contractual for some (seniority list instructors, line check pilots, line validation pilots, etc.) and at the Company's choice for others (chief pilots, duty pilots, etc.).

ALPA COMPENSATION REFERENCE HANDBOOK DELTA

Full Service Bank Transactions, Premium Pay, and Distributed Pay

	BANK	IN C/O	CURR C/O	PAY CRED	RATE
BUY NEXT VAC -	18:20				
04JAN 0209SP 17	8:09	2:21	1:41		\$ 3,464.98
DIST TRNG PAY:	1:13	@ 5.431000			\$ 396.46
DIST TRNG PAY:	1:00	@ 5.431000			\$ 325.86

Full service bank transactions for deposits and withdrawals are computed at the carry-over rate for the bid period. There will be a negative dollar amount when making a deposit and a positive dollar amount when making a withdrawal. When purchasing additional vacation days as in the picture above, there is no dollar amount associated with the transaction since the transaction only deals with days and time.

The premium pay information includes:

- Identical information to trips in the assignment summary above.
- Total pay in dollars
- Similar to the Assignment Information section, Total pay in the Premium Pay Summary section is calculated by converting each column's time to minutes and multiplying the minutes by your pay rate per minute (that is rounded to six decimal points). These dollar amounts are added together to get the total pay for that line.
- Items that pay double pay will have the actual number of hours shown, and the dollar value will be doubled. For example, a 10-hour assignment that received double pay for a pilot making \$100 per hour will show as "10:00" and "\$2,000.00"

Distributed training pay is calculated by converting each column's time to minutes and multiplying the minutes by your pay rate per minute (that rate was rounded to six decimal points).

Pay Totals

ADVANCE PAY	- \$ 10,511.71
GROSS PAY	\$ 30,143.35
MEAL EXPENSES	\$ 592.68

The pay totals section contains the following:

- Flight Advance / Advance Pay – This will correspond to the amount on the pilot’s end of month Delta Pay Statement (pay stub)
- Gross Pay – Determined by adding all reserve guarantee, full service bank transactions, distributed training, premium pay, and any other payments to the pay subtotal and then subtracting the flight advance.
- Gross Pay Adjustments (if necessary)
- Total Gross Pay – This will correspond to the “Flt Pay/Pilot” on the pilot’s mid-month paycheck following the bid period
- Meal Expenses – This will be the total per diem received by the pilot during the bid period and will be paid on the pilot’s mid-month paycheck. Depending on tax treatment, this amount may be separated into different categories on the pilot’s Delta Pay Statement (pay stub).

Pilot Expense Data

PILOT EXPENSE DATA						
DATE	LOG	TYPE	S	TIME AWAY FROM BASE	EXPENSES PAID IN THIS PAY PERIOD	
08DEC	C405	MEAL	P	63:18	\$	170.56
14DEC	0288	MEAL	P	19:56	\$	48.84
19DEC	C542	MEAL	P	83:59	\$	229.18
26DEC	3989	MEAL	P	58:49	\$	144.10

TOTAL DOMESTIC MEALS					\$	342.02
TOTAL INTERNATIONAL MEALS					\$	250.66
TOTAL MEAL EXPENSE					\$	592.68
TOTAL MISCELLANEOUS EXPENSE					\$	.00
TOTAL MEDICAL EXPENSE					\$	.00
.....						

The pilot expense data includes the following:

- Time away from base for each assignment
- Total per diem for each assignment - This will include domestic and international in one line
- Total domestic per diem from all assignments.
- Total international per diem from all assignments
- If applicable, taxable non-layover per diem will display on a separate line
- Total per diem expenses.

Non-Printer-Friendly Version

LOG VALUE INCREASED BY 100%			TOTAL PAY: \$	12,419.93

The line items details will include the following as applicable:

- Rotation information
- Pay code for the applicable pay rate
- Pay category
- Time in hh:mm and total minutes
- Applicable rate per minute
- Pay for each item – Everything is calculated by the minute.
- Total pay summary

This box explains exactly how you were paid for that line of pay. It will include any additional pay (SIT, EDP, etc.) in the calculations. For a regular green slip, this will also show that the pay was doubled with the statement “log value increased by 100%.”

Pilot Activity Statement

The Pilot Activity Statement (PAS) contains most payroll information in a single source. The PAS is an additional tool, not a standalone document. It is produced as a part of payroll closing and is available on the 15th of the following month along with the iCrew Pay Statement. To view your PAS, go to DeltaNet -> Flight Operations -> Popular Tools -> MyPAS - Pilot Activity Statement. The PAS is also linked from the My Money tab in the HR Self Service page. Pilot Activity Statements are available for the previous 7 years. Click on a particular month to bring up a specific PAS. They can be viewed in the browser, printed to a PDF file, or exported as a .CSV file for viewing in a program such as Excel.

PAS Parts Explained

Each PAS is divided into 4 sections:

- My Performance Dashboard
- Pay Summary
- Statements
- Rotation Details

My Performance Dashboard

The “My Pay” section of the performance dashboard contains a pie chart showing the individual components of pilot pay as a percentage of total pay for the bid period. There is one chart for the pilot, and another comparing a group of pilots, selectable on the PAS website (your current category, all pilots on your fleet, all pilots on your base, or all pilots at Delta).

The “My Hours” section displays a stacked chart of pay hours for the current bid period and a 12-month average for the pilot. References are also provided for the Average Line Value, Targeted Line Value, Reserve Guarantee, and Line Construction Window. On the PAS website you can hover over each item to display details.

The “My Operation” section displays on time performance for the pilot and all pilots in the system compared to a system goal established by the Company. This is for reference only and does not have a direct effect on pay.

Components listed in the performance dashboard are:

- Block Hours Flown
- Deadhead (including surface DH)
- Guarantee - Reserve and training guarantee, instructor and administrative pilot guarantee, and line check pilot rotation and monthly overrides.
- Credit, Misc - All credit identified in rotation details and miscellaneous credit (project pilot office days, ALPA days, etc.)
- Premium Pay - green slips, inverse assignments, etc.
- Training
- Vacation
- Sick/On the Job Injury

The performance dashboard does not include:

- Per diem
- Expenses/Reimbursements - cab fare, parking, medical, etc.

- Pay Adjustments - The PAS is a static document that is not updated. If a pay adjustment is later made, it will not be reflected on the PAS.

Pay Summary

Pay Summary										
Pay Details										
Description (Pay Code)	Block Hours Flown		Additional Pay Hours	Deadhead	Minutes Under	TAFB		Pay Hours	Amount Paid	Notes
	Dom	Intl				Dom	Intl			
FLIGHT TIME PAY	B737-900	12:29	0:54	4:49	0:48			19:00	\$5,136.84	FLIGHT TIME PAY
	B737-800	1:32			0:19			1:51	\$497.93	FLIGHT TIME PAY
	B737-700	1:57	0:04	3:58	0:05			6:04	\$1,632.84	FLIGHT TIME PAY
4F1R	738 Comp. Rate		2:09					2:09	\$578.67	TRIP REMOVED FOR COMPANY CONVENIENCE (PWA4E)
SCC	738 Comp. Rate		4:00					4:00	\$1,076.60	SHORT CALL CREDIT (PWA 4.H.3.)
SURFACE DEADHEAD	738 Comp. Rate			1:30				1:30	\$37.50	SURFACE DEADHEAD
SICK	738 Comp. Rate		8:28					8:28	\$2,278.80	SICK
RESERVE GUARANTEE			32:37					32:37	\$8,805.41	RESERVE GUARANTEE
DISTANCE TRAINING PAY			1:23					1:23	\$374.00	DISTANCE TRAINING PAY
SUB TOTAL		15:58	49:35	10:17	1:12			77:02	\$20,418.59	
PER DIEM						105:28			\$258.40	TAFB Rate: Dom-\$2.45/hr
TOTAL AMOUNT PAID								77:02	\$20,676.99	

The pay summary contains high level details of all items included in the “My Pay” and “My Hours” portion of the dashboard. It is presented in a similar fashion to the iCrew Pay Statement and contains plain language details for pay codes.

Total hours and total dollar amount earned for the month for flight pay is listed on the SUB TOTAL line. The per diem earned for the month is added to that to get the TOTAL AMOUNT PAID number.

Statements

Statements

The Rotation Details section lists for each rotation flown:

- Method of trip award (e.g., PBS, white slip, green slip)
- Rotation number
- Detailed information for each leg flown including: equipment flown, domestic/international, scheduled block time, actual block time, and minutes under
- Pay breakdown including each individual pay treatment that affects the rotation

Delta Pay Statement (Pay Stub)

Delta Pay Statements (pay stubs) are generated each pay date and are available on DeltaNet (DeltaNet -> HR -> Self Service -> My Money -> Pay Statements). They are normally available the business day prior to the pay date.

Each Delta Pay Statement (pay stub) includes the following information

- Pilot identification
- Pay Period
- Total earning summary, current and YTD
- Itemized wage earnings

COMPENSATION REFERENCE HANDBOOK || DELTA

- Itemized non-wage earnings (imputed income)
- Deductions
- Taxes
- Net pay and direct deposit information
- Company 401k contributions
- Time off information (not applicable to pilots)

PAY IN CATEGORIES WITH MULTIPLE PAY RATES

The 220, 320, and 73N categories currently have multiple aircraft pay rates. This section is an update from Contract Awareness Bulletin 21-10. Not all pay scenarios are included here. If you have any additional questions, please contact the Contract Administration (Enforcement) Committee.

Regular Pilots

Pay is computed at the composite hourly pay rate (set forth in *Section 3 B. Pay Tables*) of the aircraft shown on the pilot's adjusted line. In other words, a pilot is paid on a leg-by-leg basis at the rate of pay applicable to the aircraft model that was flown. The EOM paycheck will always be paid at the lowest rate and the mid-month "cleanup" paycheck will include the rate difference to the highest rate.

Reserve Pilots

Pay for reserve pilots is calculated by taking the reserve guarantee in their category and multiplying it by the hourly rate of the highest paying aircraft that all pilots in their category can be expected to fly during the bid period. Any flying performed is then subtracted from that value until the result is zero. Once the result is zero, reserve pilots are paid at the rate for the aircraft that was flown.

There is no case where a reserve pilot will be paid less than his/her published category's reserve guarantee multiplied by the highest hourly rate for the aircraft he/she can be expected to fly during the bid period. The EOM paycheck will always be paid at the lowest rate and the mid-month "cleanup" paycheck will include the rate difference to the highest rate.

Pilots in Qualification Training

Pilots in qualification training are paid the greater of the value of the rotations removed to accommodate such training or a pro rata portion of the average line value (ALV) multiplied by the highest paying aircraft shown on their line for each day of training, including days off.

Pilots Attending CQ

For each day of posted training, pilots assigned to CQ are paid 5:00 at the highest hourly rate for the aircraft they can be expected to fly during the bid period.

Pilots Attending Recency or Reestablishing Recency Training

For each day of posted training, pilots are paid 5:00 at the highest hourly rate for the aircraft they can be expected to fly during the bid period.

Pilots on Vacation

Each day of a pilot's awarded vacation will receive 4:35. The hourly values for each day of vacation will be multiplied by the lowest hourly rate for the aircraft they can be expected to fly during the bid period of when the vacation is used.

Pilots on Sick Leave

Regular pilots on sick leave receive the associated aircraft rate for each leg dropped due to illness. Reserve pilots receive a pro rata share for each on-call day dropped due to illness multiplied by the lower hourly rate for the aircraft they can be expected to fly during the bid period.

Deadhead

Pilots who deadhead by air transportation on a flight designated by the Company will be paid for the deadhead segment at the rate of pay applicable to the aircraft model they are deadheading to operate.

If the deadhead occurs on the pilot's last leg of a rotation, the pilot will be paid at the rate of pay applicable to the aircraft model previously operated.

Rotation Credit

Any credit at the end of a rotation is paid at the pay rate applicable to the pilot's last non-deadhead flight segment of the rotation.

AUDITING YOUR PAY

Pilots have multiple ways to audit their pay information. While this section is not an all-inclusive guide on how to check your pay, it should assist with the basics of ensuring you were paid correctly.

1. Compare your personal logbook and Rotation Displays to your Pilot Activity Statement
 - a. Check the following for accuracy:
 - i. Report time each day
 - ii. Block out, block in, flight time, scheduled flight time, and minutes under for each leg
 - iii. Flight time pay for the rotation
 - iv. Remaining credit for the rotation
 - v. Additional pay, no credit for the rotation
 - vi. Total rotation pay hours
 - vii. Time away from base for the rotation —One method of ensuring the TAFB is correct is via a time calculator located at:
<https://www.timeanddate.com/date/timeduration.html>
 - b. Check top of PAS for total flight pay and dollar amount for the month on the SUB TOTAL line
 - c. Check top of PAS for total per diem amount and added to SUB TOTAL to get the TOTAL AMOUNT PAID amount
2. Look at Time Card and iCrew Pay Statement
 - a. Time Card
 - i. Make sure each entry is correct and matches Pilot Activity Statement
 1. Flight hours line includes minutes under
 2. Full service bank transactions
 3. Distributed training
 4. Vacation, payback day, and IVD counts
 - ii. Generally speaking, if your Time Card is correct, your iCrew Pay Statement will also be correct
 - b. iCrew Pay Statement
 - i. Make sure each entry's time is correct and pay amount is correct
 1. Block hours do not include minutes under
 2. Carry-over rate
 3. Full service bank transactions
 4. Distributed training
 5. Per Diem
 - ii. Note that:
 1. Total pay for activities are calculated by converting each column's time to minutes and multiplying the minutes by your pay rate per minute (that rate was rounded to six decimal points). These dollar amounts are added together to get the total pay for that line.
 2. Ensure appropriate amounts are doubled for regular line green slips and inverse assignments
 3. While time from the ADDTL PAY ONLY column on the Time Card is not displayed on the iCrew Pay Statement, it is still accounted for when calculating the dollar amount in the TOTAL PAY column of the iCrew Pay Statement
 4. Full service bank transactions are paid at the carry-over rate for the bid period

5. Carry-over rate is computed as the dollar value of a pilot's accumulated credit for the bid period divided by the accumulated credit and expressed in dollars per minute
 - iii. Sum everything above ADVANCE PAY and that should match SUB TOTAL line from Pilot Activity Statement
 - iv. Double check that ADVANCE PAY is one half of your category's reserve guarantee at your payrate – ADVANCE PAY should match end of month Delta Pay Statement (pay stub) entry of "Flight Advance/Pilot"
 - v. Subtract ADVANCE PAY from SUB TOTAL and this is GROSS PAY
 1. GROSS PAY should match consolidation Delta Pay Statement (pay stub) entry of "Flt Pay/Pilot"
 2. Note that because several categories have different pay rates as well as trips with international pay, GROSS PAY often will not equal "pay hours x pay rate"
3. Look at Delta Pay Statement (Pay Stubs)
 - a. Ensure flight pay matches iCrew Pay Statement
 - i. Flight Advance/Pilot on end of month Delta Pay Statement (pay stub) matches ADVANCE PAY
 - ii. Flt Pay/Pilot on consolidation Delta Pay Statement (pay stub) matches GROSS PAY
 - b. Per diem on consolidation Delta Pay Statement (pay stub) should match iCrew Pay Statement
 - i. Depending on tax treatments, per diem amounts may be separated into different categories on the Delta Pay Statement (pay stub).
 - c. Deductions per "R&I Update -- It's Time to Check Your Checks" document
 - i. 401(k), Delta and ALPA benefits, DPMA, ALPA dues, donations, etc.
 - d. Taxes
 - i. Federal withholding based on your income and the elections you selected on your W-4 on file with Delta
 - ii. Other taxes per "R&I Update -- It's Time to Check Your Checks" document
 - e. Company 401(k) contributions
 - i. Compute your 17% contributions and compare to amount listed
 1. 18% effective January 1, 2026
 - ii. Compute your Market Based Cash Balance Plan contributions
 - f. Check all amounts both for the current Delta Pay Statement (pay stub) and for year-to-date (YTD) amounts
4. Fidelity Net Benefits
 - a. Confirm personal and Company 401(k) contributions are correct
 - b. Confirm Market Based Cash Balance Plan contributions are correct

PAY CORRECTIONS

The Dispute Process

While it is well beyond the scope of this Handbook, *Section 18 B. 1-2.* of the PWA details the process by which a pilot can resolve a dispute with the Company concerning the application of the PWA.

In any potential grievance situation, including those that are related to pilot pay, it is critically important that a pilot adhere to the timelines in *Section 18 B.* Pilots at Delta have an individual obligation to address noncompliance issues with the Company within 120 days of the event or dispute. In these situations it is *also* critically important that pilots retain as much documentation as they can concerning the event. This includes, but is not limited to, copies of original and final schedules and rotations, and copies of the pilot's rotations, Time Card, iCrew Pay Statement, Pilot Activity Statement, and Delta Pay Statements (pay stubs) for the event in question. This also includes any correspondence, preferably with a date and timestamp, with the Company on the issue.

Step 1 - Contact Company Representative

The first step in any potential dispute with the Company is addressing the issue in a timely fashion. To do this, use the Crew Assist app on your EFB or their website at <https://dal-jetstream.my.site.com/pilots/s/>. When you launch the Crew Assist app, press the large red button labelled 'Submit Pay Issue' and follow the instructions in the form. As was expressed in the section above, it is critically important that the pilot document this step and the Company's responses thoroughly.

Step 2 - Contact Association Representative

If the Company's answer via the Crew Assist app is unsatisfactory, the next step is to contact ALPA.

- If your rotation or Time Card is not showing the correct pay, contact the scheduling committee at 1-800-USA-ALPA or through the Scheduling Ticket System at <https://dal.alpa.org>
- If your pay check is incorrect, contact the Contract Administration (Enforcement) Committee at 1-800-USA-ALPA or via the Data Action Reporting Tool (DART) at <https://dart.alpa.org/>.

Pay Corrections from a Previous Month

- To check if your pay has been updated, please note the following:
 - a. If you receive a pay correction from a previous month, your Time Card for the appropriate month will be updated
 - b. The iCrew Pay Statement and Pilot Activity Statement is released only once with regards to activity/time on the Time Card as of the pay day close date
 - c. The iCrew Pay Statement can be updated with remarks and pay adjustment details as Pay Roll receives pay corrections
- The money from the pay correction will be paid on your next Delta Pay Statement (pay stub), which can be denoted in one of the following ways:
 - a. Sent out as a standalone Delta Pay Statement (pay stub)
 - b. Added as an adjustment on the next iCrew Pay Statement and thus be included in your GROSS pay. The correction is then not visible on your Delta Pay Statement (pay stub).
 - c. Added as a separate line item as ADJ/Corrections on the next Delta Pay Statement (pay stub)
 - d. May not be listed as a separate line item but rather be added to your ADVANCE PAY or GROSS PAY from your iCrew Pay Statement
 - i. In this scenario you will have a higher Flight Advance/Pilot or Flt Pay/Pilot amount on your Delta Pay Statement than is on your iCrew Pay Statement (and so the correction is not easily visible on the Delta Pay Statement [pay stub])

Notice of Overpayment

The Company completes internal audits of pilot pay in search of overpayments. If you are issued an overpayment notice:

- Contact your Chief Pilot Office immediately to request an explanation of the alleged overpayment and review your repayment options
- Complete the Delta Overpayment Data Collection form found [here](#) on the Delta MEC website so your case is officially documented and tracked by the Association
- Contact your Local Council Representatives to learn if your state or local laws have any statute of limitations or protections from overpayment claw backs
